Introduction 1

Volcanoes Extra..... 2

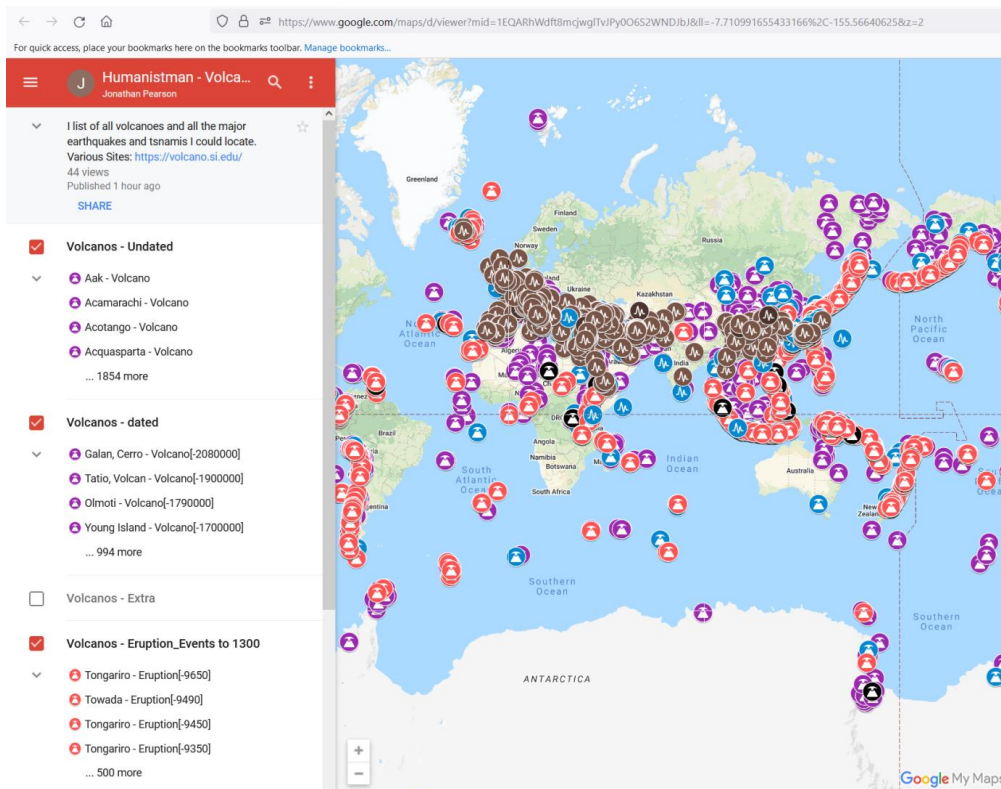

Introduction

This is the fourth document in a series of 5 - because of size limits. See the first initial document for details. **Volcanoes** <https://humanistman.com/wp-content/uploads/2021/11/Volcanoes.pdf>

Volcanoes databases have been improved over the last few decades. As I explore human history I see humanity developing at active volcano sites. Tensions, challenge, hypothesis. Something to contend with. My maps are getting too big for Google Maps so I split off the volcanoes into a different set.

Here is a link to my Map

<https://www.google.com/maps/d/edit?mid=1EQARhWdft8mcjwglTvJPY006S2WNDJbJ&usp=sharing>

Red volcanoes are recently active and also eruption events.

Volcanoes Extra

<Placemark><name>Jeju Volcanic Island and Lava Tubes - Volcano</name>
<description><![CDATA[https://whc.unesco.org/en/list/1264 Jeju Volcanic Island and Lava Tubes
together comprise three sites that make up 18,846 ha. It includes Geomunoreum, regarded as the finest lava
tube system of caves anywhere, with its multicoloured carbonate roofs and floors, and dark-coloured lava
walls; the fortress-like Seongsan Ilchulbong tuff cone, rising out of the ocean, a dramatic landscape; and
Mount Halla, the highest in Korea, with its waterfalls, multi-shaped rock formations, and lake-filled crater. The
site, of outstanding aesthetic beauty, also bears testimony to the history of the planet, its features and
processes.]]></description> <styleUrl>#icon-1498-0F9D58</styleUrl>
