Introduction

Volcanoes databases have been improved over the last few decades. As I explore human history I see humanity developing at active volcano sites. Tensions, challenge, hypothesis. Something to contend with. My maps are getting too big for Google Maps so I split off the volcanoes into a different set.

Here is a link to my Map

<https://www.google.com/maps/d/edit?mid=1EQARhWdft8mcjwglTvJPY006S2WNDJbJ&usp=sharing>

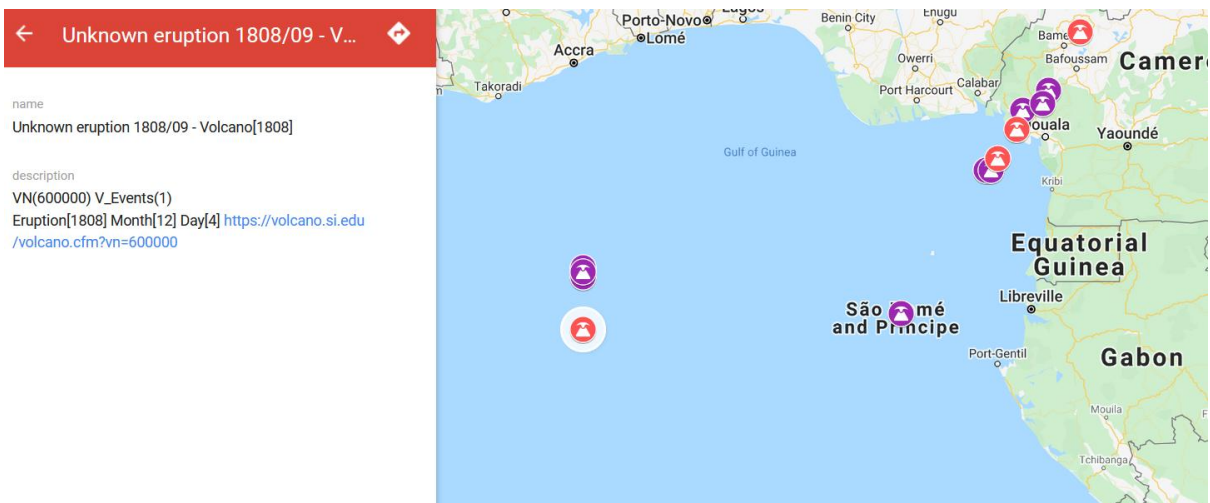

Red volcanoes are recently active and also eruption events, purple are old or not active, Blue are within human activity human, black ones are ones to watch out for. Earthquakes are brown and dark brown for big ones and tsunamis are blue.

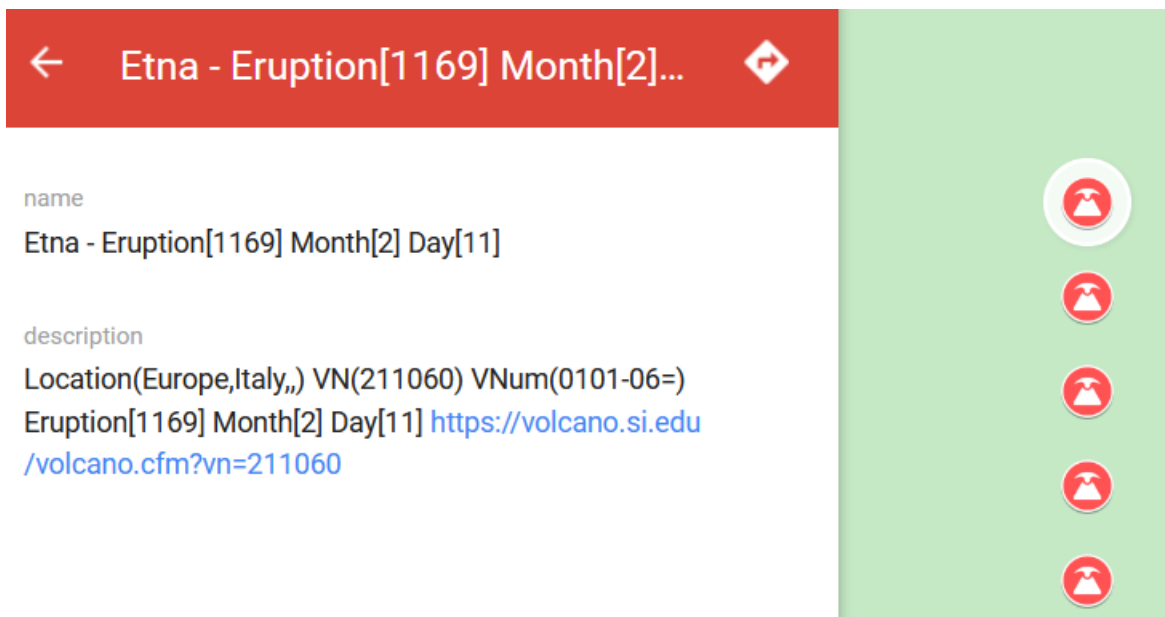

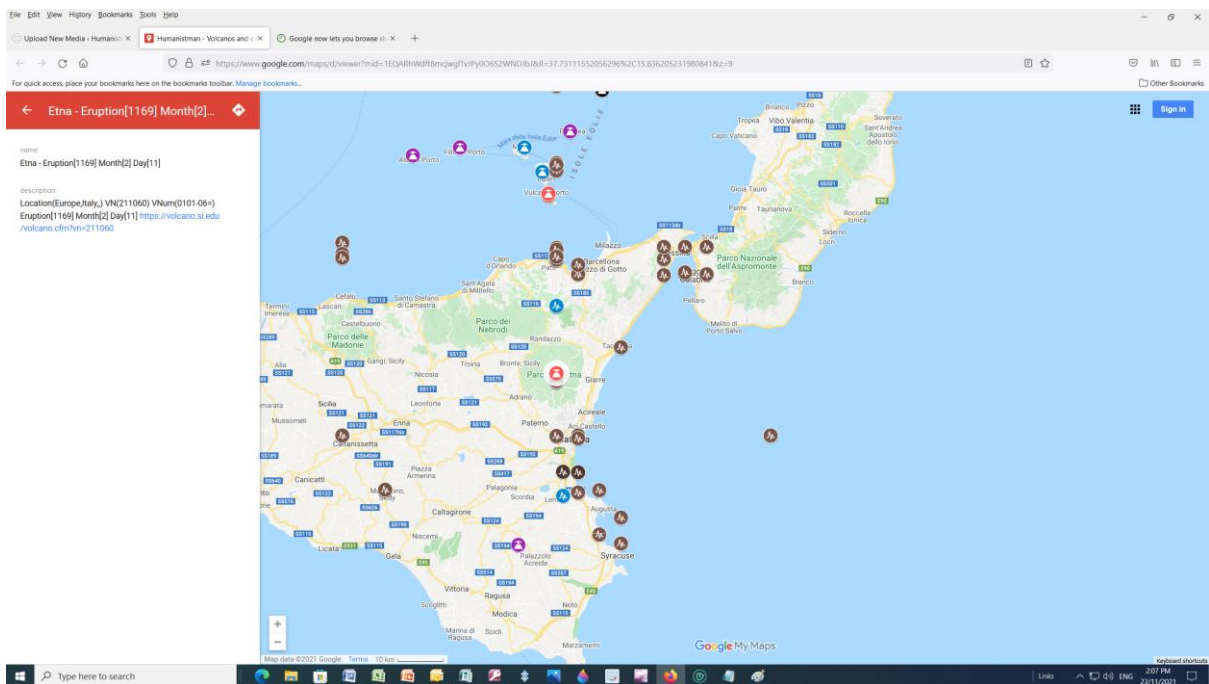

There are 5 different folders because of the limit of 2000 in google maps.

Volcanos undated, dated, extra, eruptions, and earthquakes and tsunamis.

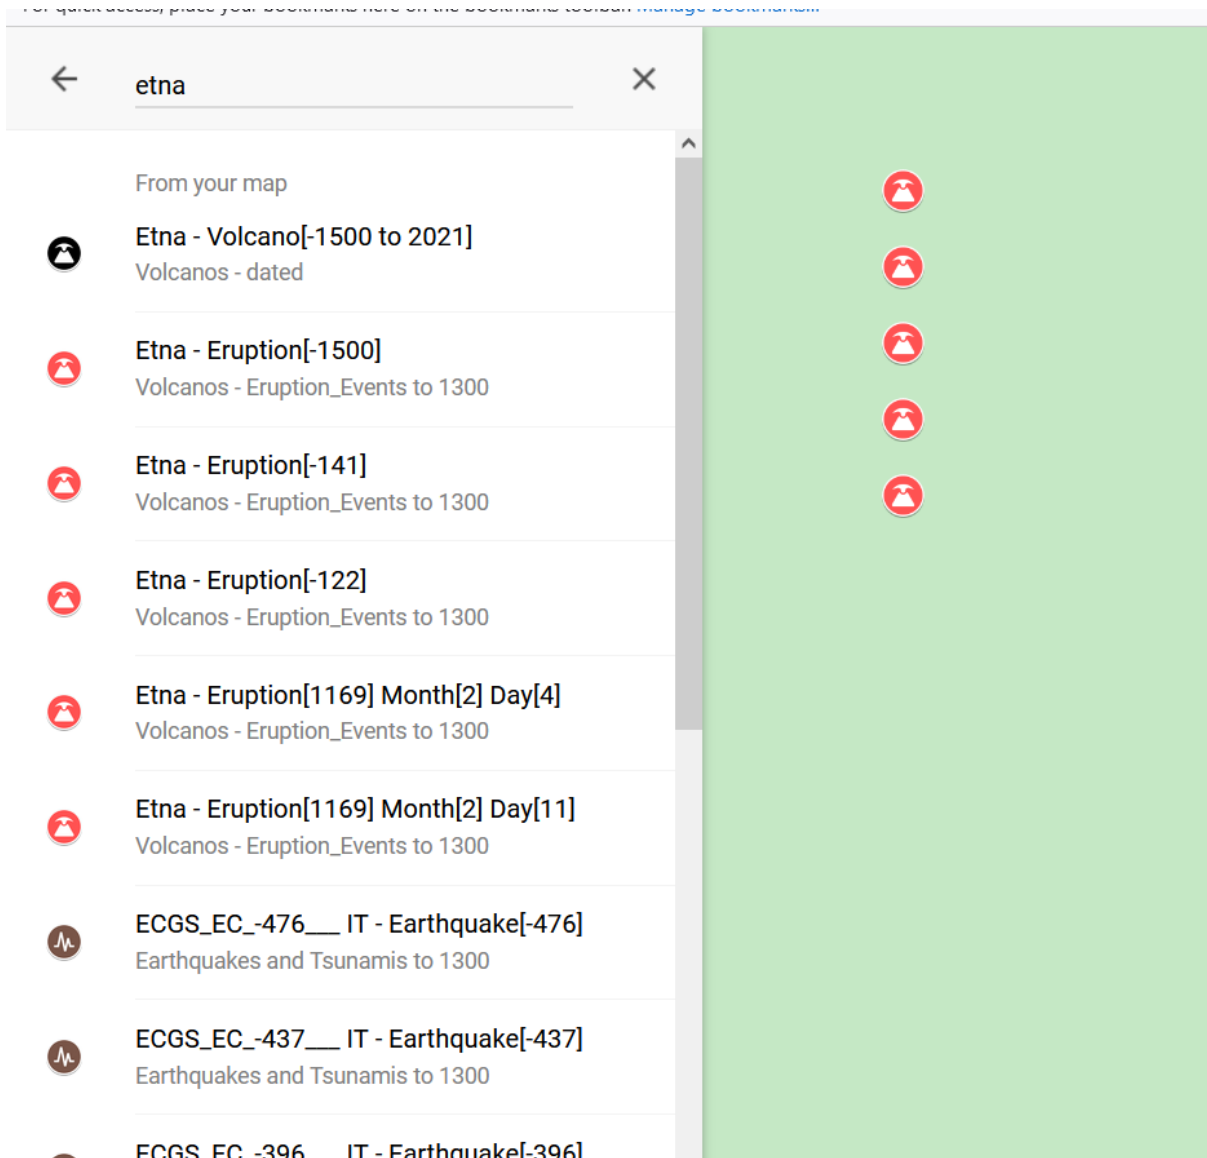

Problem placemarks appear at 0,0 location or nearby.

You have zoom in to see all the events - e.g. mount Etna

Or use search once you have a name to search on.

Framework

Humans, Development, History

Population

Humans, Planet

Questions

1. Is looking at recorded history to 1900 enough for volcanoes?
2. I don't want to be swamped by noise of recent activity - why?

Planet, Notice

Sites

Many people have done many things with computers and cooperation in the recent decades. In the last 50, and especially the last 30 years, huge amounts of information can be explored, examined and exposed in public.

1. *The **Smithsonian Institution's Global Volcanism Program (GVP)** provides the content on this website (volcano.si.edu) in support of the overall Smithsonian mission for the "increase and diffusion of knowledge." All material created by and made available on this website by GVP is governed by the Smithsonian **Terms of Use**. The Smithsonian invites visitors to use its online content for personal, educational, and other **non-commercial purposes**.
<https://volcano.si.edu>*
2. **NOAA National Centers for Environmental Information (NCEI)** is responsible for preserving, monitoring, assessing, and providing public access to the Nation's treasure of geophysical data and information. <https://www.ngdc.noaa.gov>
3. **VOGRIPA** <https://www2.bgs.ac.uk/vogripa/index.cfm>
4. **WOVOdat** is a comprehensive global database on volcanic unrest aimed at understanding pre-eruptive processes and improving eruption forecasts. WOVODat is brought to you by WOVO (World Organization of Volcano Observatories) and presently hosted at the Earth Observatory of Singapore. <https://www.wovodat.org/>
5. PALEOMAP Project <http://www.scotese.com/>

 35. **The Tertullian Project** A collection of material ancient and modern about the ancient Christian Latin writer Tertullian and his writings. **Roger Pearse** Welcome to my blog, which at this instant has 4,319 posts containing 2,746,876 words (these are dynamic figures). I'm interested in the ancient world, and the early Christians within it; in the ancient texts and the manuscripts in which these reach us; and in the **free circulation of information** about all this online. <https://www.tertullian.org/>
 36. Founded in 2000, this **online encyclopaedia** provides—in a clearly arranged way—information on a wide range of topics in Chinese history, literature, art, religions, and philosophy. It draws to a great extent upon Chinese-language secondary sources and thus gives access to information rarely found in Western books. This is particularly interesting for those not able or not brave enough to read Chinese. Specializing in the economic, military, and administrative history of late imperial China **Dr. Theobald's research projects** include an analysis of the Second Jinchuan Campaign (1771-1776): *Economic, Social and Political Aspects of an Important Qing Period Border War* (2013). This book is the most detailed study

to date of the financing and supply arrangements of one of the great wars of the Qing dynasty. It was carried out as part of the international research project "Monies, Markets, and Finance in China and East Asia, 1600-1900", funded by the German Research Foundation. <http://www.chinaknowledge.de/index.html>

37. **ArchaeologyinBulgaria.com** is dedicated to bringing you the latest and most exciting news and feature stories about Bulgaria's stunning archaeological, historical, cultural, and natural heritage – as well as to exploring the wider Human – Earth connection on a global scale <http://archaeologyinbulgaria.com/>
38. The office of the **Fortified Churches Foundation** is located in Sibiu <https://kirchenburgen.org/en/fortified-churches/>
39. **Archaeological Atlas of Antiquity:** <https://vici.org/>
40. **Andy Burnham**, (andy@megalithic.co.uk) created this site and runs it in a voluntary capacity. It is funded as a non-profit making independent society with membership and a committee. Andy writes: I am an amateur in hopefully the best sense of the word. Where I don't know something I take the advice of the more knowledgeable. Over the years, this project has become a **major team effort** with input from thousands of photographers, archaeologists, locals and visitors so individual comments are the views of individual contributors. <https://www.megalithic.co.uk>
41. **Bradshaw Foundation** <https://www.bradshawfoundation.com/>
42. <https://www.castles.nl/>
43. This site contains over 1100 web pages, over 10,000 pictures, videos and maps, plus hundreds of thousands of words all focused around the ancient **Nabataean Kingdom**. <https://nabataea.net/about/about/>
44. **Archiqoo** is a cultural and interactive website that provides information about archaeological sites. The website, which currently includes 2875 sites spread across 27 countries, relies on a very smooth and simple way to present its contents. It is also bilingual (Arabic and English) in order to be available to a larger audience. Archiqoo aims to spread the heritage of human civilization, encourage visiting and highlighting the importance of preserving archaeological sites. <https://archiqoo.com>
45. The **Archaeological Survey of India (ASI)**, under the Ministry of Culture, is the premier organization for the archaeological researches and protection of the cultural heritage of the nation. Maintenance of ancient monuments and archaeological sites and remains of national importance is the prime concern of the ASI. Besides it regulate all archaeological activities in the country as per the provisions of the Ancient Monuments and Archaeological Sites and Remains Act, 1958. It also regulates Antiquities and Art Treasure Act, 1972. <https://asi.nic.in/>
46. <https://www.harappa.com/>
47. <http://www.historyofwar.org/>
48. **C. Patrick Doncaster**, 21 November 2021 **TIMELINE OF THE HUMAN CONDITION — Milestones in Evolution and History** — <https://www.southampton.ac.uk/~cpd/history.html>
49. **Jenny Strauss Clay** Creator and contributor to Mapping the Catalogue of Ships and **William R. Kenan, Jr.** Professor of Classics, University of Virginia. <https://ships.lib.virginia.edu/>
50. In as much as **I am an individual** and not affiliated with any educational group or organization I wish to convey my appreciation to all those entities involved in the publication of the wealth of material on the ever more studied and increasingly popular subject of the Ancient Near East. At times the immensity of the effort necessary to achieve my goal of a

*concise and yet comprehensive collection of abstracts (**compendium**) as a **portal to further studies** has made me consider ceasing my labour of love on the subject. But each time I have felt compelled to return to my endeavours, realizing at last that **this is a work of a lifetime** and that no one could with any hope possibly read in totality the staggering amount of material on the subject. Admittedly I am the author of original material only to the extent of my reading and consolidating articles into what I consider most relevant to a beginning or intermediate comprehension of the subject; and of course the additions derived from my own studies (addendums) <https://ancientneareast.tripod.com/>*

51. *It is my pleasure to share this growing interactive record of my ongoing voyage through the history of information and media. Your comments are welcome. Bon voyage! **Jeremy M. Norman** January 2, 2021 <https://www.historyofinformation.com>*

Noticing

Post-hoc is archeology, real-time is the written record. We see humans noticing the planet and recording information - writing it down, telling stories, making up myths and fairy tales. The human record is one of **noticing**.

The record of volcanoes and events is the record of humans noticing.

My working theory is the volcanic events **do something to development**. Humans in the rift valley, Greeks, Romans, animal life in Galapagos islands. Some kind of necessary tension and inventiveness - some chaos

Accuracy and Precision

6:00 am on January 20 200 million years ago the meteor hit the earth? I can't remember (without effort) what I did last week!

The rule of 5's - 5 significant digits of the common measure. Years - 10,000 (at a stretch). Millions of years - between 200 and 300 million years ago? 3 then, 3 digits or 4 digits of the measure.

10,001 seconds ago? Too precise but even with accuracy it becomes (Mills) un-useful.

I moved things around on the Map a little so they could occupy slightly different positions and not exactly overlap. Generally, for events, I changed the digits after the decimal point of the **Latitude** to match my unique database number.

I made up some location numbers based on the textual descriptions where lat and long were missing.

I deleted many duplicates locations and events.

I specified years. Months and days (not hours, minutes or seconds) but any year before 1300 is a guess (by anyone) at best although there are some good guesses to use.

Duplicate Names and Locations

There are some different volcanoes which have exactly the same names. Cerro Azul, San Diego, San Carlos, San Juan, Flores, Sierra Nevada, Apagado, Sumbing, Kancana, Santa Isabel, Black Butte, etc.

Volcanoes move around over time and are called many different things. The volcano numbering systems try to reduce duplicates but there are still some issues. Here are some I found.

Volcano Name	Volcano Number	Number	VVVP Country	Lat	Long	Elevation (m)	Nm	Loc

Method

Months. Internet, searching, wikipedia. Google maps, loading and unloading. Generating KML in excel. Many database downloads. Manipulation in MSAccess. Downloaded KML, manipulated in word macros (replace text) - tidied up - tabs replaced then inserted to make fields to be loaded in msaccess using MEMO fields to hold the long strings of descriptions and coordinates. Working out the style icon structure exported from Google.

Generating KML by msaccess queries from tables storing locations, events and icon information.

Checking, adding, fixing, making mistakes, etc. Learning more about how google maps works - trying to keep things simple but structured.

KML icons styles for Google Maps

Put this at the top of each KML file before the placemarks.

```
