## Introduction to Everything

*Why so direct Jon I, mean, why speak so directly? - it all seems a little confronting?*

*Timing - I may already be too late.*

## Preamble

Once again I think I need to explain something going on at the moment which demonstrates our society's ability to notice and cogitative and cognitive abilities. The ABC answered some questions at senate estimates recently about paying the legal fees for a person who works at the ABC for their private court costs in a defamation case where the person - using a public messaging system (not owned by or related to the ABC) made public allegations against a member of parliament. The ABC is essentially a public service department - a minister is responsible although it does have its own board.

The answer to why the ABC funded the individual's lawyer, court and other costs was given as "we were advised that we (the ABC) might also be subject to a defamation case" (or words to that effect).

I have noticed that no analysts seem to understand what is going on here so I will try to explain it. The trick to exploring these types of things is to look at many angles and use simple ideas and expressions and spend some time on it. i.e. check your assumptions. Give yourself time to think about it. It is complicated and not simple and sometimes the first reaction is to shy away from a more detailed examination and just "go with the flow" (as the frog slowly boils).

So when is a public service employee allowed to speak publically about anything?

There is a problem here because over the last few decades - as the government has become more totalitarian and authoritarian - it has determined that public servants cannot express themselves as individuals in public or PRIVATE forums - even if it is understood that although they work for a department, they do not speak on behalf of the department on their own time. So even if an employee says that they definitely do not represent their department while expression their views on matters related to their work - and not telling secrets and not divulging sensitive information or any other crime - they have been admonished and sanctioned by their departments.

For example "I do not agree with some policy my department is implementing and here is why..."

Generally - especially at senior levels - it was generally recognized - in a non-dogmatic way - that commenting on government or policy matters related or even NOT related to your work - even at general high level was not good form - even when not specifically prohibited under the public service Act and the official secrets Act. Spying, Agents, Bad Actors, Trust, Public Confidence, Impartiality etc.

We get an extension to this idea which is called "whistle blowing" - which is formally making complaints about something going on in a public service department - usually the one you are working in after management refuses to do anything.

Both whistleblowing and expressing opinions has been dogmatically tramped on for the last few decades to the extent we have trials in courts in Canberra against whistleblowers in secret and people are locked away in Canberra jails in secret.

So we have this ongoing trend in totalitarianism and jumping on debate, question or discussion. (see 18C).

This comes from a growing corruption of **the idea of public service** which has progressively been replaced with self-centered narcissism and slavish devotion to the state (or the minister of the day) - in a "personal" kind of way. This comes from a growing promotion of women to senior positions based on their identity and promotion of others based on "causes". At the same time John Howard sacked many senior public servants some decades ago to be replaced with people he considered "more responsive". So the idea of the public service is now fully corrupted - replaced by self-centered promotion and "causes" - usually based on virtue signaling (look at me - look how good I am). So obviously we have growing narcissism and tyranny - not just in A.C.T. Magistrates court but wide spread around universities, media, public services, schools, etc.

So that gives us some context to the thinking framework for these people.

Now let us look at the specific answer.

The idea that - **just in case something might happen** we did this. (gave money to the person in their personal case).

Let us explore that a bit. Well what else might have happened? What are all the scenarios? Did they examine all the possibilities or just one? What conclusions did they reach and why?

Firstly - the person - as I understand it - was asked simply to retract her public statements about the member of parliament - a simple retraction and apology for posting publically allegations which were not proven in a court nor were any charges laid.

As I understand the person refused to apologize or retract. In other words - there was no court case, there were no charges laid, there was no authorized due process going to take place to determine whether a crime had been committed and there were no proceedings related to the allegations underway. There was no ongoing police investigation. Think about that for a little. What would taking the law into your own hands or vigilante journalism look like to you?

This doubling down approach we see not only at the ABC - but everywhere - A.C.T. Magistrates court (Philip Kellow, Judicial review team, Magistrates, registrars, etc) , Politicians (Andrew Barr, Gordon Ramsay, Andrew Leigh, all my members in state and federal levels, etc), Helen Watchirs at ACT

Human rights, Public servants(ACT Ombudsman North, etc)(3 years and still going) - this refusal to re-think and acknowledge anything - sometimes abusive and violent as well.

So we see this determined pig-ignorant, abuse and doubling down - not just on “their certainty” but the seemingly joy-filled personal abuse they inflict on “others” - in this case the Politician who had public allegations made against him by this person who works at the ABC.

This is a pattern at the ABC that seems to come from the board, management and staff.

So what about the scenarios?

1. ABC stays out of it (**Default/Do nothing**)
  - a. Person pays for their own process (responsible, accountable, learning)
    - i. Person withdraws and apologizes (responsible, accountable, learning)
    - ii. Person doubles down and refuses (responsible, accountable, learning)
  - b. ABC also served with papers later (responsible, accountable, learning)
2. ABC gets involved (**Do Something**)
  - a. ABC encourages (**Debate - Adult**) person to withdraw and apologize
    - i. Person withdraws and apologizes (responsible, accountable, learning)
    - ii. Person doubles down and refuses (responsible, accountable, learning)
      1. ABC funds person (-accountable)
      2. ABC refuses to fund person
      3. ABC sacks person (responsible, accountable, learning)
  - b. ABC apologizes on behalf (**Intervene**) of staff member (**Parental - Child**) and issues its own apology and costs
    - i. Person withdraws and apologizes (responsible, accountable, learning)
    - ii. Person doubles down and refuses (responsible, accountable, learning)
      1. ABC funds person (-accountable)
      2. ABC refuses to fund person
      3. ABC sacks person (responsible, accountable, learning)
    - iii. Person does nothing - does not answer or respond (like Andrew Barr, Andrew Leigh and the rest do with me)
      1. ABC funds person (-accountable)
      2. ABC refuses to fund person
      3. ABC sacks person (responsible, accountable, learning)
  - c. ABC **Fully supports (Virtue)** person in anything **she chooses (Indulged)** to do
    - i. Person withdraws and apologizes (responsible, accountable, learning)
    - ii. Person doubles down and refuses (responsible, accountable, learning)
      1. ABC funds person (-accountable)
  - d. ABC chooses to defend her and itself - despite not having been served with papers and **takes over**(the **hero/victim** model) the case

Are there more possible scenarios? You will see how the model above is like a general kind of thing - it looks familiar doesn't it? - like it might work for families and other things where there are kinds of “disputes” between individuals and an organization is involved? A decision tree would be a better way of representing this.

You can see that there is a bit more going on in the “what might happen” space than was illustrated in the simple initial statements. It is a little more complicated but we can look at the possible “mights”, or at least some of them.

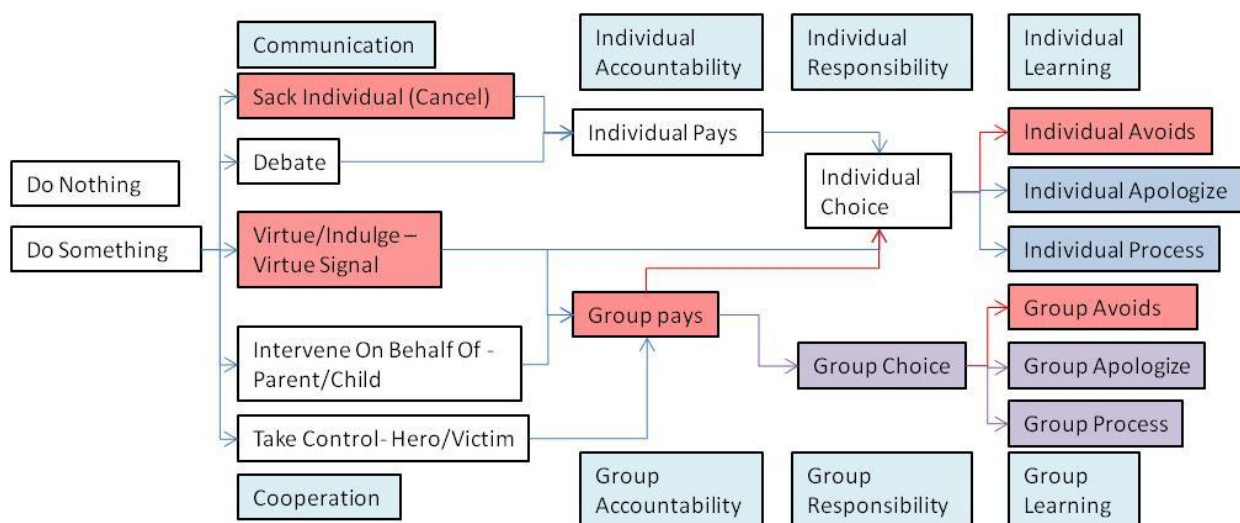

The general model seems to follow the spoiled brat, entitled feminist passive aggressive type model. The choices seem to allow some strange behavior of the group (the ABC) and the individual - where the Group (ABC) assumes responsibility and the individual person never assumes responsibility, accountability and learn anything - thus encouraging the spoiled brat/feminist/passive aggressive/psychopath. We see this in family and domestic violence cases which encourage and reward people for lying and making false and unproven allegations - the “fear of possibilities”, fear of “might happen”, etc.

Now while some of the possible scenarios are ‘possible’ - they may not change anything - for example - 2.b - where the ABC seems to take ownership of the information that their employee publically declared - like they are responsible for everything their employee does in their own time (think Christmas parties or sexual encounters in parliament house after work).

2.c looks like church indulgences doesn’t it except in this example the money flows in a different direction to the virtue, a bit like donating virtuously to the “needy” (donating edible bibles, etc)

Outcomes will depend on the court process and the willingness of the Politician to negotiate or continue. This is not the prisoners dilemma but similar to game theory and Nash - but we can still explore and understand it. Do not be put off just because some people win Nobel prizes for some models around this type of thing!

So we see options which allow some responsibility, accountability and learning to take place at organization and individual levels but we also see the organization subsidizing the individual’s personal choice - doing whatever they want and using the organization’s money to do it - so the individual’s accountability is reduced. You will see the familiarity now with the State premiers and their culpability for their tyranny and totalitarianism.

So I generalized the model a bit and used some of my Group Telos and Individual Telos models. The ideas of communication and cooperation are strong at the start of the process and then we move

through the ideas of accountability, responsibility and learning - at the end of the day **something should be learned by someone.**

It seems to me that sacking/cancelling the person is wrong - it is a bit like how the ABC convicts (names and shames) any man accused of anything - they should allow the proper process to take place rather than rush to judgement. Pre-emptive sacking/cancelling (football players, men, domestic violence laws, family law, "respect", "white ribbon", etc) before due process seems wrong to me - but many people in the Media, ABC, Politicians (Labour, Greens), Police, Courts, Schools, Universities, Human Rights and in other places disagree with my view.

Debate (counseling and discussion) and communicate/cooperate(Time off, leave, etc) seems like a reasonable supportive role without taking sides or responsibility or accountability.

The idea that the group apologizes or does the process instead of the individual seems also corrupt but is representative of the general feminist model (mental illness) of someone else (the group, the others) being to blame for a women's actions (battered wife, extenuating circumstances, coercive control, etc) . The individual avoids the process and makes the group pay for it. In this case - the Taxpayer while the lawyers rub their hands with glee. Meanwhile the individual learns nothing and doubles down.

It also seems wrong to guarantee the money yet allow the individual to choose what happens. The individual could run away, ramp up costs, choose anything they like. This seems to be wrong on the face of it no matter what the circumstances - either the ABC runs the case - takes control - or it stays out of it. Groups paying for individual conduct while not at work should be avoided by public service departments as a rule.

The corruption problem is that the individual seems not required to learn or be held accountable. They can do, say and choose whatever they like and there are no consequences by way of costs, or learning. This always falls to the group. It seems to be the standard Feminist corruption meta model.

The better outcome it seems to me is that the individual go through the process - not the group. The Individual chooses to apologize or double down and take responsibility AND accountability for that In which case any use of group's money is wrong and would need a strong argument to justify.

I suspect that most Australian women have been trained never to expect to be accountable or responsible for their behavior. I should RESPECT that I suppose.

So did the ABC examine these models or scenarios - I doubt it , but they may have used a different one based on what they could get away with - how they could hide their corruption and lack of thought, analysis or justification by say "the lawyers told us to". Maybe they decided what they were going to do - knew that senate estimates would come up and designed a way to lie about it and hide their corruption.

So lets us examine the idea that "we might get served" - SO WHAT?

1. We get served
  - a. We pay for us
  - b. We pay for staff member

2. We don't get served
  - a. We pay for staff member
  - b. We don't pay for staff member

If the ABC does not get served then why pay for staff member?

If the ABC gets served - even if at a later date - it can choose to pay for staff member or not - that choice is still there.

BUT NO Jon - there is something else going on here!!!

If Staff member could not afford to defend themselves and didn't want to retract their statement and apologize - what could they do? They could borrow money for lawyers. They could seek to negotiate with the Politician. **They could go to the ABC and ask them to pay their legal costs.**

**Or The ABC could decide to pay their legal costs no matter what!**

**Both options require the ABC to have already decided to pay the legal costs up front - whether approached by the staff member or not. (Virtue/Indulged)**

The ABC did this because they either believed that her allegations and behavior was defensible (that she would win) - in which case they effectively become a party in the case OR they were indulging her choices. So did they believe her public allegations? Why or why not? Were threats or **blackmail** involved? Is the decision maker Compromised/Partial/Incompetent/Corrupted? Why should "alleged" crimes/offenses be treated differently? An allegation of lying by a **professional reporter** seems a serious offence to me. Would a male reporter be treated the same way? **Professional** athletes cheating at sport?

There is still more - The Legal "community" do everything they can to make as much money as they can - to the extent that legal "advice" is often about ensuring members of their community are enriched. Hence if the cheaper option was to apologize and withdraw - which is no real skin of anyone's nose and zero cost (let the normal police and legal processes take place if there are charges to be laid) - or double down then - and **you need to understand this** - then the **allegations she made public** should have been **put as a criminal case before a court** - not as "allegations" and "defamation" case which all designed to give lawyers as much money as possible. This is IMPORTANT because the family law and domestic violence laws have all been designed to continue to allow ALLEGATIONS or FEAR OF POSSIBILITIES (Family Law, ACT Domestic Violence laws, etc) to be used as legal reasons for convicting people. WOMEN ARE NEVER MADE TO LEGALLY PAY FOR THEIR BEHAVIOR. This has led to widespread vigilantism, rampant allegations and a **breakdown of the rule of law and presumption of innocence**. Moreover it is encouraging vigilante, extremists, causists, feminists, women to use personal attack and allegations to attack individuals (rather than due process) they do not like AND they fail to take responsibility or accountability for their actions.

The ABC - in particular - have made it one of their causes to act like judge, jury and executioner in its targeted programmes on political parties (honey traps), politicians and individuals it does not like or agree with and encourages and rewards vigilante journalism in its staff.

## Corruption in Public Service - Null, Fisher, Monty Hall, Learning

The public service is corrupt - mainly by feminists, communists, caustics (Binary, Gorupthink, Bigots) - women (on average) and weak minded men - let us examine how.

The **Null case** is **not** the Not, Not double negative because that requires some thing to **be** not of.

The **Null case** is **not** zero because that is too certain - (a certain infinity).

The **Null case** is **not** only the SQL null from an outer join - it is **more Null** than that. No thing at all.

The first step is to **notice** some thing. Next comes **choice** - the Fisher hypothesis test.

See **04 Humanism – Information Classification Frame, Version 1, date 10/02/2019**

<https://humanistman.com/home/frames/humanism-frames/> <https://humanistman.com/wp-content/uploads/2019/02/04-Humanism-%E2%80%93-Information-Classification-Frame.pdf>

		Live?	
		Y	N
Choice Option1?	Y	<b>TP</b> A. Option 1 and live	<b>FN</b> B. Option 1 and die
	N	<b>FP</b> C. Not Option 1 and live	<b>TN</b> D. Not Option 1 and die

(Slide 9) see how true positives TP for choice we tend to bias towards?

So the first choice is do **some thing** or **NOT**.  
[https://en.wikipedia.org/wiki/Type\\_I\\_and\\_type\\_II\\_errors](https://en.wikipedia.org/wiki/Type_I_and_type_II_errors) Here Fisher's "null hypothesis" (type1,2 errors) is slightly different from my more null "Null" which comes before noticing that choice exists.

Do nothing and Live?  
 Do nothing and Die?  
 Sacrifice a chicken and live?  
 Sacrifice a chicken and die?

Our do nothing and die history is an evolutionary graveyard of extremely large proportions. Just a little larger than the do something and die. Our do something and live is really, really, really..... tiny.

So we tend to "do something" - make the first choice - so our first bias is slightly different based on gender. Men tend to "do something" (lack of fear, conscientious(hero)), Women tend to avoid NEW untested action (agreeableness, anxiety) and stay with mob certainty - status quo or mob popularism.

So the **first choice** of do something or nothing seems to instill the first hero/victim role play based on slightly different preferences on gender lines. Failed choices are blamed on **perpetrators** and successful choices belong to **heroes**. *Only an idiot would have thought that sacrificing a chicken was the right choice/How intelligent he was to think of sacrificing a chicken!*

*The earthquake stopped once we sacrificed enough chickens.*

There are **so many things** to notice that sometimes we filter out (fat, dumb and lazy) things - even if they are large and threatening (someone else's problem (SEP) and the elephant never attacked us before).

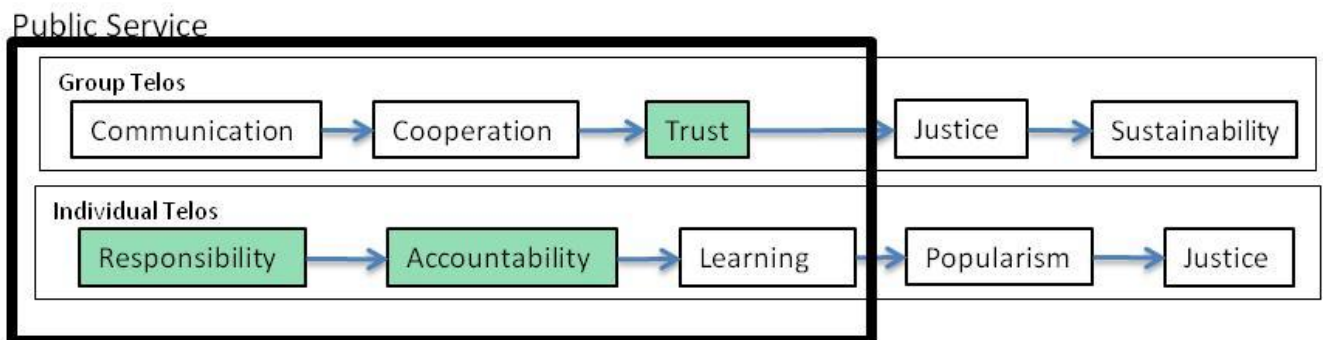

So once we are in the choice mode we are in Monty Hall/Transfinite choices and probabilities - complicated but defined (bounded).

***We have been informed there is an elephant in the room what shall we do Monty? Let us set up a choice game!***

In setting up the choices - we need to explore and examine possible choices - so we both set up the possibilities and multiple choices and examine the choices and outcomes themselves. Setting up the game of possibilities AND exploring the game. Both require skills and effort and **anyone** who thinks they are the expert in this is delusional and a **Pharisee of certainty**.

See <https://humanistman.com/home/articles/> , <https://humanistman.com/wp-content/uploads/2021/02/Binary-Groupthink-Overcoming-1.pdf>

So the **public service** becomes our definite "do something" game setter uppers and players. Their choices are designed to be considered, open, transparent, in the public interest, explorers, discoverers, **explainers**, exploration of options and choices.

You can see where the problems are already can't you - once you let narcissists, identitarians, popularists, virtue signalers and **"just causists"** in can't you? It is not ONLY that they are stuck on (sunk cost) sacrificing chickens - it is about the just cause of "chickens" (or themselves) - binary certain chickens of salvation. What about black and diverse chickens? (says one) Yes especially black chickens!! As long as chickens are there we have choice - the more the merrier! We will find the "right" chicken - eventually - the "God" "chicken" (made up of massively certain God particles). *Who do you work for? - I am the Departmental head of "Chickens" - fantastic! The correct pronoun is "chick"*

So the reason public service exists IS TO help societies **sustain their trust and cooperation**. So even when politicians are corrupt - at least we can rely on public servants who are highly learned, good communicators, good cooperators, are trusted individuals (not corrupt or causists - no hidden or personal agenda), are accountable and responsible for how they personally behave - honest open and talented. They learn from mistakes.

Public servant MUST BE ABLE (their responsibility) to communicate exactly why things are important and why decisions are made (not “cause”, lies, bullshit, avoidance or passive aggressive games).

**Burdon Of Proof.** It is not up the Minister or Senate to find out if a public service department is corrupt - it is up to the public service to prove they are not.

**Why do you do that? What Makes think that is a good idea? Justify your decisions. Prove it.**

- We have a policy in place to pay all staff legal costs in defamations?
- We have a process she went through a process and a decision was made?
- The dog ate it?

If they can't prove it **then they are corrupt and have failed**. This is why you need people of the highest standards of non corruption because if they make a mistake it is **more forgivable** because our best people tried their best. They are **not judged on an instant** - they are **judged on a life of service**. (think children authentically learning)

This is why permanent tenure was important because it allowed people - AUTHENTICALLY - to learn, make mistakes and improve. They were constantly responsible and accountable - senior figures publicly known - and held in high regard for it. **Reputation mattered** - not money or how much you could get away with. Instead we get contractors, avoidance, outsourcing and people spending their work time and our money on themselves, their selected virtue causes (Helen Watchirs, Andrew Barr, premiers, police chiefs, universities, etc) and avoiding questions, avoiding accountability, refusing to do their work if it is too difficult and refusing to take on major issues (explore, communicate, learn, competent, etc). Fat, Dumb, Lazy, Corrupt.

We see people appointed for being a woman, black or identitarian. (Self promoting - self or in-group centered). Determined pig ignorance and certain causists of weak minded people. Whole departments are created for enforcing Bigotry and groupthink (Women, Blacks). **Causes are substituted** for learning and used to **hide accountability** and **responsibility** (at least we use the right pronouns (See Defense, Courts (White Ribbon), ACT Human rights commission and anything Andrew Barr does - e.g. Schools, etc). The public service starts playing with justice and popularism instead of doing its job.

In David Anderson's case it is in plain sight. The ABC only gives time to ideas and people it thinks are Good and deliberately censors or attacks ideas or people it thinks is Bad. This is in plain sight - yet no-one does anything?

I wrote directly to the ABC and politicians about this in "Open Letter to Politicians and the ABC.docx" on 1/7/2019. <https://www.theguardian.com/media/2019/jun/26/australian-media-unite-to-demand-government-change-laws-after-afp-raids> Today David Anderson pontificated about "**public**

**Interest journalism**” - again the concept here is that journalists will decide what the truth is and what truth needs to be told.

Who cares what the policy says David, hey? - when you use the certain god of “Public Interest”. Keeping us “safe” from baddies who might **harm** or **offend** us (18C).

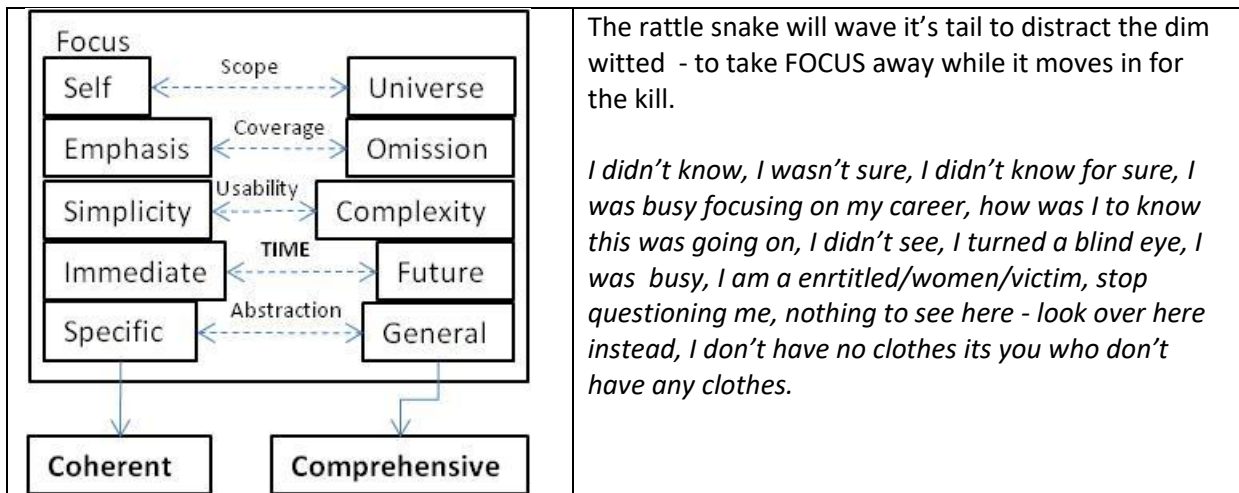

<https://edpols.abc.net.au/guidance/84/> “Beyond formal research, our best gauge of community standards is our audience. We engage directly with viewers, listeners and users on air and online, including through social media. They give us **constant feedback**, including complaints, and this can help us to determine what is and isn’t likely to upset them in the future.”

**Well David - I have giving been you feedback for years - I am offended and the constant promoting of identity politics, demonization of people, bias against men and people you do not agree with or like and use of the ABC as a cause weapon. I think the whole organization is corrupt. This offends me and harms men in particular.** It is not a complaint - it is an assessment.

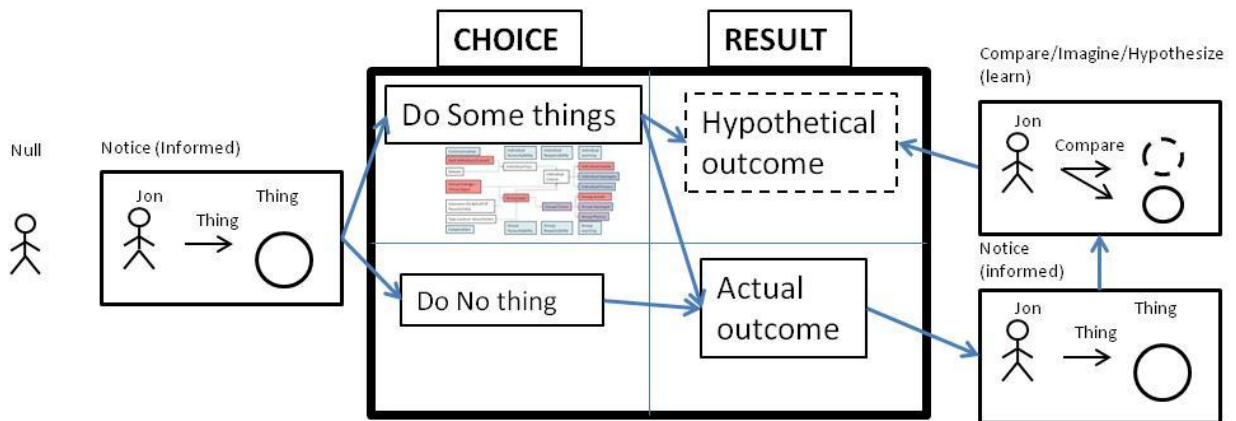

SBS is currently play self-promotion and “changing the world” type propaganda. Julie Gillard says “*I will not be lectured ... by this man*”. **Typical Passive Aggressive** bullshit we see from women everywhere “I was afraid he was lecturing me”. She would rather be lectured to by people she already agrees with and likes. The **Entitled Victim** narrative is strong in Australian women - especially Labour the psychopaths in the Greens. “I accuse you” (everyone but myself). Who is to say what is Good or Bad??? God of virtue - god of binary certainty? The media truth fairy? David Anderson makes sure his staff know which ones to focus on. In his mind this politician was already judged.

Sleazy liars, self-promoters, bigots, zealots, tyrants may exist in business and non public funded places but they do not belong in the public services, politicians or public media. Earthquakes, Tsunamis are real - they really exist and required real action - no feminist, causist, communist, blue, black, green, “believer”, popular, celebrity, tyrant, binary thinker, smuglifunt, idiotologist is going to know what to do about anything that really matters.

The ABC and Labour party spend most of their time attacking individuals they don’t like or disagree with rather dealing with their elephants in their caves of smug certainty. Anthony Albanese, Penny Wong and Chris Bowen would **rather focus** on the silly words of French president making allegations against an Australian Prime Minister (of the opposite side politics (binary hatred)) than looking and the tyrants, psychopaths bullshitters, bigots and destroyers of society in their own political party in Melbourne, Brisbane, Canberra and all over Australia. Rampant lies, corruption and bigotry is ignored in favour if the binary certain causist’s preferred focus of personal attack of “others”. Penny, Albo and Chris **rushed** to public **judgement** - based on **allegation** alone for their own personal advantage - their wealth, their power - they would rather TRASH THE COUNTRY than defend it or uphold the rule of law - just like any **psychopathic tyrant**. (ABC, Domestic Violence Law, Family Law, Women, weak minded men, Magistrates, Universities, etc). No amount of letters from Lord Acton would ever get through to the smuglifunts of binary certain abuse - the greedy, self-centered, tyrannical, violent delusions and lies. The Media is too dim witted to do anything other than follow the pretty lights of distraction - the baubles, bangles and bright shiny things of scurrilous slander and personal attack - the gossip that women love “political games”.

I explored this in some detail in **15 Humanism – Corruption – Nation Choice – Virtue, Version 1**, date **03/04/2020** <https://humanistman.com/wp-content/uploads/2020/04/15-Humanism-Corruption-Nation-Choice-Virtue.pdf>

We learn and reflect on outcomes and imagine hypothetical outcomes during **and** after the process. What if? Anxiety and Learning/Improving/Development

### The Big Red Button of Certainty

Now, I am not talking about you - dear readers - because you are not the stupid zealots, bigots haters and cognitively challenged humans. It's the "others" - I am talking about. Let us imagine you create a big red certain powerful button - because in your wisdom - a wise person would know exactly when to use it and when not to. The problem then becomes keeping the button safe from fools and others.

Because it would not be you - you who created this big certain red button who misuses it - it would be the others - dear reader (with an r) - you see. That is why this big red button of certainty is a dangerous thing - not because of you - but because of the "others".

### Doctors

While the country has been pummeled by the tyranny and abuse of politicians, police and courts using emergency powers because of a virus - the elites - that is to say - the politicians and media - have been working on their pet projects. Women have been advancing their causes and promotions, premiers having been making new laws to repress people - but at the same time innovate new virtue

signaling “life saving” (keeping people safe) legislation - called euthanasia. Legalizing killing - it is not so much that Australia agrees with the death penalty but the dogmatists want to mandate when exactly this takes place (like all good virtue signaling tyrants do). Andrew Barr has been working on other legislation during this “emergency” like legalizing drugs, making “coercive control” a crime for men (but mandated by the state), sentient animal legislation, more money for women, criminalizing people who don’t allow children to change the sex, criminalizing people (especially parents and doctors) who argue or talk to children when that want to be gay, lesbians, cats, dogs ,get tattoos, gender change surgery and so on - in a mandated kind of certain dogmatic way.

He could have been working on understanding the health system and ensuring that there were enough things in place to stop the emergency lockdowns because of his hysteria and fear - but he has been focused on others things (his virtue) for the last 2 years and many years before that - his personal crusade.

See, the thing about doctors is - that generally they are well trained and trusted professionals who generally have a wealth of knowledge and experience and they have access to a professional network of liked minded, educated and knowledgeable people - much more than say a feminist, public servant or politician might have in this field of “humanity”.

Death and other significant life changing events wasn’t dogmatic - each doctor and nursing staff knew exactly what the issues were and would work with patients and family to ensure that the best decisions could be made on a case by case basis rather than dogmatized by some mindless virtue signaling politician or bureaucrat. This worked well for thousands of years. States did not tyrannize on what doctors could prescribe - if it was legal and safe and done in the best interests of the patient - then the patient, doctors and families worked together - far more trustworthy environment than the “state”. The medical professionals - the doctors - play an essential role in health. They are trusted and responsible. Once the state stomps all over that it will become as corrupt as a Nazi experiment.

## **Introduction**

The determined ignorance and abuse by the Smuglifunts is on constant display. Tyranny and abusive tyrants (mandated for life) now dominate most of the world and all layers of society. Tyrants are at full war with humanity.

## **Framework**

Humans, Development, History

## **Population**

Humans, Individual

## **Questions**

1. Can I locate missing things?
2. What signs or patterns might help?
3. Have others done this?

## Initial Conditions

Individual, Group

## Self reference

Individual, Group, Communication

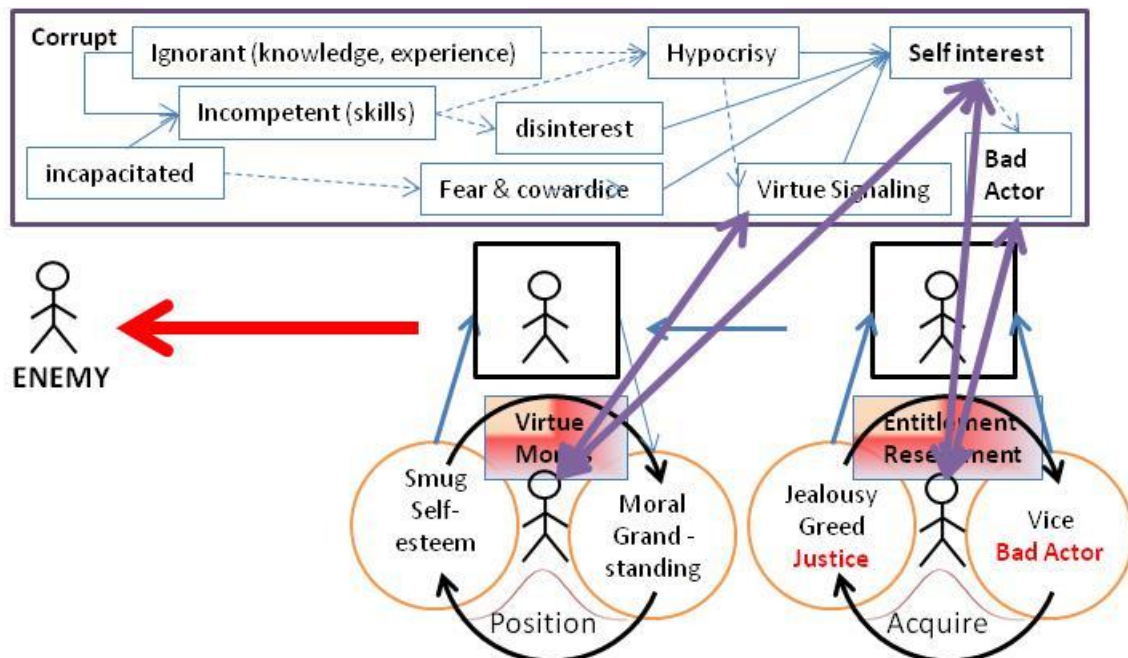

## A Review of Binary

I have a mind to rearrange the binary models - especially the hero/victim/perpetrator binaries and mix them into the four box middle and highlight the continuums. I had already done most of this here **16 Humanism – Complexity – Structure, Version 1, date 27/04/2020**

[https://humanistman.com/wp-content/uploads/2020/04/16-Humanist-%E2%80%93-Complexity-Structure.pdf](https://humanistman.com/wp-content/uploads/2020/04/16-Humanism-%E2%80%93-Complexity-Structure.pdf) **Binary Groupthink** <https://humanistman.com/wp-content/uploads/2020/06/Binary-Groupthink.pdf> and elsewhere but most lately here **Why Not A Humanist Manifesto** <https://humanistman.com/wp-content/uploads/2021/08/Why-Not-A-Humanist-Manifesto.pdf>

You will remember the binary thinking patterns which encourage abuse and violence - the fat, dumb and lazy and also the under-developed humans (feminists, women(on average (wages)), weak minded men and binary thinkers) **Time Reaction Pattern Habit Plan** <https://humanistman.com/wp-content/uploads/2021/05/Time-Reaction-Pattern-Habit-Plan.pdf> and **Responsibility Accountability Learning Popularism Justice** <https://humanistman.com/wp-content/uploads/2021/04/Responsibility-Accountability-Learning-Popularism-Justice.pdf>

In this re-arrangement I will bring the Drama triangle into focus for some further exploration. We will see where the hero/perpetrator/victim fits and what they represent and what drives them.

So the virtuous hero is constantly delivering justice (filled with morals and virtue) to “the enemy” (perpetrator) to protect/revenge/save the entitled/resentful “victim”. I am going to position the

binary models in three points with the **hero** at the top in the middle - the **perpetrator** on the right at the bottom and the victim on the left at the bottom.

This allows me to **align it** with my other models - the realigned Einstein/Fisher 4 box model as well as the conglomeration of models

**DON'T PANIC !** I will step through slowly and explain as I go. The point is that I am trying to show the general tensions for the binary thinkers who position themselves - this might allow some exploration and questioning to emerge in their minds.

One can always hope.

Now let us manipulate (again) Einstein's equation into a Fisher type 4 box model.

$$E = M * C^2$$

$$\frac{E}{E} = \frac{M}{E} * \frac{C^2}{E}$$

Known  
Certain  
Choice

unknown  
Uncertain  
Hypothesis  
Energy

THING -----THING  
is ----- Not  
Same ----- Different  
Group ----- Opposite

Mass Dogma  <b>M</b>	Infinite, <b>Chaos</b> Uncertainty Complexity Probability  <b>C<sup>2</sup></b>
Choice Action  <b>E<sup>A</sup></b>	Notice <b>Question</b> Hypothesis  <b>E<sup>Q</sup></b>

Now the joke in this model is that Chaos **is** certain and known. We know it really exists but - as humans - we like to pretend it doesn't. So the top two boxes are our most certain and **declared** things. Our declarations of things, our dogma, our home, our sunk cost - all against the chaos of "uncertainty", probability and complexity - the infinite. So the box lines are like two functional relationships - multiplication and ratio (division) which are very similar to each other.

Einstein played around with where to put energy in the equation - which order to put it in and how to represent it. I have resolved that into turning the equation into a declaration of unity - the unit 1 or in this case E divided by E - which is the **initial self reference** and **recursion** declaration.

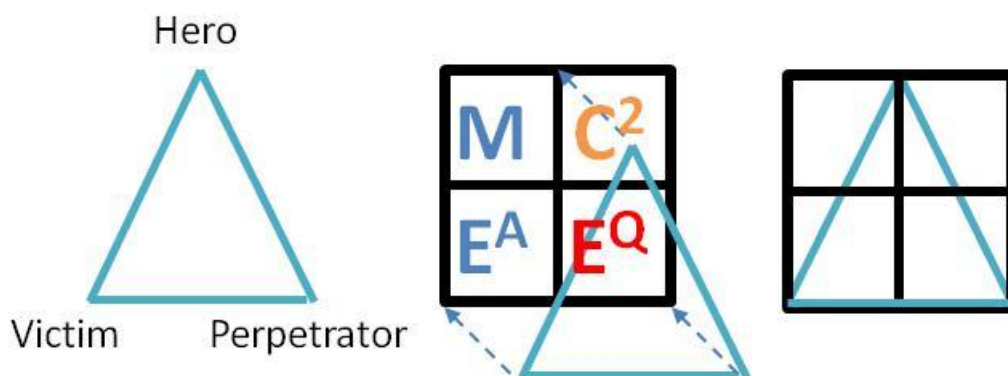

This then puts Energy into different relationships with mass and chaos. The Energy of Mass is choice and Actions generally around known things (Cantor's Transfinite, Zipf, Benford, Monty Hall type things) and the other Energy is around chaos. This is the noticing, questioning, hypothesizing exploring type energy (within the constraints of the universe) - the things that young boys are especially good at.

We know the drama triangle of Hero, Victim Perpetrator - with the victim declaring something as Evil or Bad or heathen and the like - the declared evil. This role is declared by the victim and given to someone else (wont someone send me a hero?) in a point and shoot kind of way - I now anoint you as "the perpetrator". We see this in the media (especially the ABC, Guardian and other feminist or idiotology dominated organizations) and politicians as they call people they disagree with as "far right extremists", "Nazis", "others", "White Christian Man", etc. the "**Perpetrator**" (anointed).

The "**Victim**" - self declared - is the damsel in distress, child, etc - usually women "*I am victim, hear me roar, in numbers to big to ignore..*" - the horde - women - especially Australian women - spend most of their lives declaring their victimness - politicians like Katy Gallagher, for example, go on national TV to declare, when their children catch a virus, that they are *upset* and *distraught* and *victims* (or words to similar effect) - desperately looking for a "perpetrator" to blame and attack.

Now the "**Hero**" steps up to take the challenge to **save the victim** (or get revenge) - usually to win her favour by way of sex or other rewards like "virtue" - filling the virtue cup on the way to their self-declared binary certain heaven.

These strong binary pairs are common throughout history and usually the victim/hero bond is the strongest and they will seek out perpetrators everywhere they go. Many sociopathic women do this as a full time job and Magistrates in Queanbeyan and ACT courts play the hero role for lying sociopathic women "victims". This is a pattern with police, courts, public services and charities as well. It is a very strong and widely held pattern and many cultures around the world. Many women buy into this as a kind of codependence technique where they can manipulate the 'hero' to act the way they want in a coercive control kind of way.

So we can fit these binary models (using Archimedes triangle) onto the Einstein/Fisher model and start to explore these binary certain roles that these people play - remember the **perpetrator is assigned** by the hero/victim binary pair. Hardly anyone ever assigns themselves as "the perpetrator" - they are usually in their own hero/victim pairing or an INDIVIDUAL who does not play the binary certainty game.

The Hero places themselves exactly between the certainty of MASS/DOGMA as the protector from CHAOS/UNCERTIANTY in a binary way. You are either “with us” (the dogma, mass) or “against us”. This “us” is the hero and the victim pair. The Hero makes this **constant binary choice**. The Hero is usually unaware of the concept of a continuum. They are unaware of the continuum they are on and they are unaware of the possibility of other continuums. They are Binary and Certain.

The victim is at the base of the triangle and at the point on the square which is entirely focused on the Energy of ACTION. DO Something!!!. The Victim is **always calling for action** and they vacillate rapidly between Mass of certain dogma and the fear of the question. I suggest that this is the most common “human condition”. They tend to push the continuum towards the certain dogma - but like the hero - they are unaware of the continuum. For them it is either **Take Action** - or **NOT Take Action** - the **Energy of Action** desperate to **avoid the question** and **concentrate on the mass of certainty and dogma**. This is women but young children are just the opposite - they always asking questions and doing things.

The anointed perpetrator is the third point in the triangle of 3 **binary certain pairs** hero/victim, victim/perpetrator and hero/perpetrator. The Question is feared - Actions (choices) might happen, Chaos may arise.

The Victim - Children are closer to the question and action and thus well aware of the chaos - they can see the perpetrator (maybe as nightmares at first) and they CAN become binary like the women(victim)/hero binary pairs OR start to explore all of the continuums and many more. If the children become like women they become stuck in that binary drama triangle - being scolded as “perpetrators” or rewarded as “heroes”. Little girls are trained at schools and by the media to be permanent Victim-Women. Whole government departments are devoted to the women as victim narrative - Office of Women, Average wages - The Gender Discrimination Commissioner (Mislabelled - really female commissioner as it is legally impossible to discriminate against men - all discrimination is FOR women. Soon it will become a crime not to discriminate IN FAVOUR OF women)

The Hero/Magistrate/Social Justice warrior/Feminist - is the determined **binary** thinker - unaware and far away from the Energy of Question. There is no question - just binary them and us. Chaos or Dogma. That is why people like Magistrate Cook, Registrar Edwards, Andrew Barr and Gordon Ramsay go dumb when you pose a question. Barr hates being questioned about anything. It is why the Australian Senate jumped on Bettina Arndt who dared to ask a question. It is why the Human Rights organizations ignore me and will not answer any questions. The tyrant will decide who can have human rights and under what circumstances. The Tyrant decides when you are allowed to speak or dare ask a question, the Tyrant decides when you can disagree. It is why the feminists, ABC and other binary thinkers become violent, abusive and manipulative when a question is posed - they avoid all hypotheses that upset their hero status and dogma. In their minds their **rush to judgment** and binary certainty is “saving the world” from chaos. They are the heroes above all heroes.

## Finding Your Authentic Voice

Many have talked about the idea of authentic and truth. These ideas are often represented as positive human elements. Positive things are **difficult to define** and are more easily explained by **exploring the negatives**. The risk of defining “certain good” is the dogma that lawyers, magistrates, prophets and pontificators are involved in - in a binary certain way.

See my Human Frame - **09 Humanism – Bad and Good, Version 1, date 02/04/2019**

<https://humanistman.com/wp-content/uploads/2019/04/09-Humanism-Bad-and-Good.pdf> .

The idea of speaking truth to power is not the idea of ranting like a child (Grumpy McGrumpface) or having a tantrum (Tantrum Mc Tantface) like an hysterical women. There is something far more complicated going on.

Let us explore the technique used by binary thinkers but first re-visit the plurality continuum for groups/nations. (See my articles <https://humanistman.com/home/articles/> )

So binary thinkers lack ability in the plurality continuum and will oscillate between the two extreme end points. The general technique goes as follows:

1. Fill yourself with **individual godlike status** - tantrum, fear, outrage, hero, virtue, entitled victim
2. Attack “others” and call on the mob binaries to attack
3. Describe how the world (the mob) should now be, having attacked the “evil” others - and wash my feet while do it.

This is all that women (on average) in Australia but particularly the Labour party and the Greens women and weak minded men know. Instant individual offense and outrage (18C) followed by attack and abuse and then filling your own pockets with money and telling the mob what to do.

This is a standard technique of binaries.

The Labour party and Greens women do this all the time - I suspect it is all they know and they will never be able to develop past this. Same for Magistrates in the Canberra courts, Magistrates in general (judges) fill themselves with outrage and superiority and then deliver their “justice” for the mob - the group “causes”. Police, Guards, etc - many judges ignore law and process for “cause” now - particularly female, green, black or other identity based(identity/SELF - is everything for them) judges.

Penny Wong does her scowling face (Greta, Grace, etc) of smug superiority before each process of abuse and then explains how women need more money and change the law to remove the rights of “others”. A recent example of a female liberal party women having a go at the failure of the Labour party of women to stand up for her - Penny said (I kid you not) *“So, you are the victim now”* (with outrage and amazement) or words to that effect.

So Penny has filled herself with the hero/victim/perpetrator narrative and assigned herself in charge who is allowed to be declared a “victim” or not. Penny represents the thinking of the feminists around the world - this intense smug ugliness and entitled/victim narrative which is all binary certain and other tribal extremists know.

So women (on average) and weak minded men tend to oscillate rapidly between the extreme points of MOB and INDIVIDUAL Virtue/Outrage - sociopathy and psychopathy - usually accompanied with a **rush to judgement** and hysteria.

Jim Chalmers had a go at the prime minister for taking a holiday with his family when there were fires. Jim then went on national TV to display this oscillation of His Individual Virtue (his own hero

status on calling out the devil to the MOB) and appealing to the Mob for Mob vigilantism against the prime minister for taking a holiday. Rapid oscillation between the extremes. Obviously incoherent but he does not see it and many others ignored it. Some noticed it but could not describe or explore what was going on with Jim's behaviour.

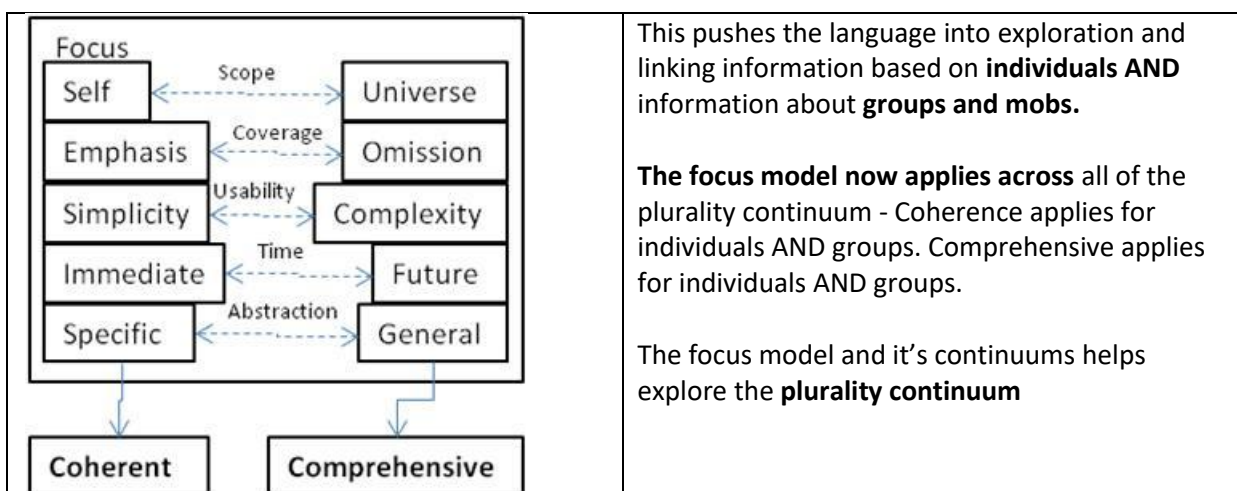

But Bill (two planks) Short-ten is the same. Now just to explain, I do not usually call individuals cheap names but this seems to be all that Penny, Bill, Albo and the rest of the Labour Party and Greens know. We have Penny's "small men" speech, Albo's "all men have failed" and Bill's "Scotty From Marketing". Bill calls his demonstrators "Black Lives Matter" "Women" "Justice" and **other demonstrators** as right wing extremists/Nazis - even when they are his own political support base! The A.B.C. and other feminist based media does this all the time as well.

So this **constant binary abuse** and **name calling** - groupthink - is all these people know. They do not know what plurality is. I have written to these people many times over many years - they simply will not engage with their own behaviour and abuse of others - especially the abuse and corruption of the political systems and the public service. They will not respond to any issue I raise in any email or letters to them. They ignore me. Same with David Anderson and the ABC board, Management and staff. ***"Why do you think it as good idea to convict men without a trial and make permanent orders that can never be revoked?"***, ***"The public service is 60% women (up from 40%) - why do you continue to discriminate for women and against men? For "equality"?"***.

To escape these binary positions you need to **let go of the individual** - the tantrum, pride, virtue, fear and hatred and **step away** from the binary position. This requires some degree of development and maturity - a self awareness of the faults of the individual human - including yourself and other individuals around you. To do this you must gain some knowledge of how individuals behave. Experience helps as does reading and examining other human lives.

To **step away from the group** you must avoid smug certainty and groupthink terms of race, religion, nation, gender, etc - you are aware of those group terms and ideas and what they mean but you are stepping away from them.

Neti,neti. This becomes the idea of not, not.

Now this is not like the smug ex prime ministers or privileged elites pontificating on what everyone ought to do - this comes from a position of individual self - they are not authentic or telling the truth

- they are pontificating (sometimes positioning or bad actor as well) based on perceived superior knowledge, experience, virtue, entitled/victim (feminists/ghosts), etc.

The **authentic voice** is one of exploration and linking real things from individuals and real things from group concepts and providing VISIBLE focus on what is being explored and how it is being explored. Young men do this when they ask questions and put things together. Children do this naturally.

It is not certain in this space - it is exploration and **mistakes will be made** but fear is overcome and steps are made, tentatively, to develop the authentic voice. The authentic voice is recognized, trusted and valued but is **always under attack** from binary certaintists dogmatists (e.g. legal scum profiteers, bad actors, etc). This authentic voice is cognitively more advanced than many humans can achieve.

**Strabo** (the Greek geographer) has this voice and is one of the first humans to leave that record. He is one of the **first scientists** because he explores other's work, examines, it, criticizes it, pulls threads together, explains how humans think and how they will react to what he writes and how they react to what others has written. He lays bare his thinking and exploration without hyperbole in and structured and comprehensive way. There is some **truth** in what he is saying - **EVEN THOUGH** he made mistakes in what the geography really looked like. He is writing as an old man. The ability to live longer because of food and safety, enables man to develop further and leave more advanced records for others to use (usually older men with advanced thinking skills - travelers, explorers)

Geography is one of the first sciences (you can travel better if you know the places, maps, wind, seas, rivers) - agriculture and animal husbandry are early too as is basic math. Confucius may be an authentic voice but I Ching provides that binary certainty which can sometimes stifle the authentic voice and exploration and keep the binary certaintists smugly satisfied. *Let's throw the **certain** dice.*

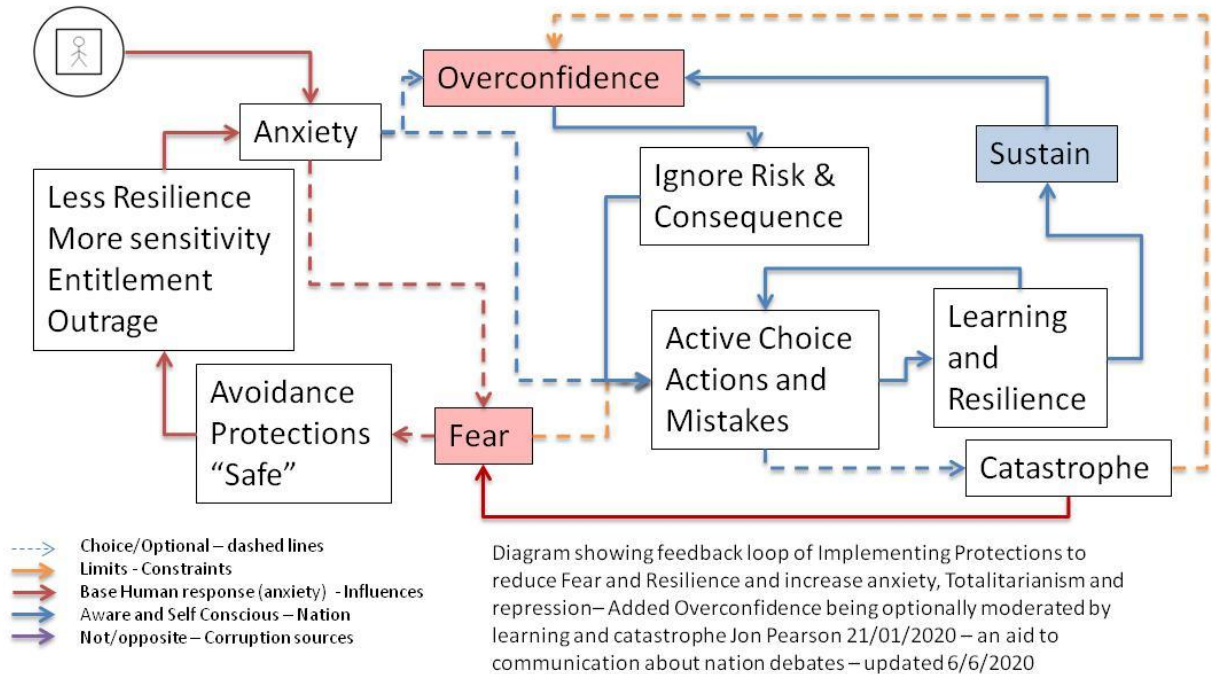

The idea that Cro-Magno, Neanderthal and closely related humans may have developed the advanced thinking I describe is a constant debate. Dressing up someone in clothes, teaching them to speak words and read, teaching them to think in a binary way and putting them in the job of a Magistrate in A.C.T. Magistrates court is not the same thing as "being human" - especially if they exhibit psychopathy - excessive virtue and self interest and signal to the "cause" - white ribbon and the Mob in a **binary smug certain** way.

You will see people speaking authentically and you will notice them more. Usually these are not celebrities and not the famous or promoted ones. You will then be able to tell who is more authentic - you see the self centered ones - the ex primeministers and their biographies. The celebrities and the truly corrupt politicians - the professional liars. The Bullshitters of society.

Now, this level of thinking - thinking at threes and not twos - is quite advanced **enough** for a large amount of complexity and advancement. But there are more levels after that - 4 is really tough and demanding and 5 is almost incomprehensible. Things become more difficult the further you go.

You will notice conceptual links to my other models. See **15 Humanism – Corruption – Nation Choice – Virtue, Version 1, date 03/04/2020** <https://humanistman.com/wp-content/uploads/2020/04/15-Humanism-Corruption-Nation-Choice-Virtue.pdf> (Page 29) and this earlier version

# Corruption-Extremists-Feedback

The Fear/Anxiety feedback loop is seen in the hysteria of women and they manifest that in **entitled outrage**, violence and abuse. The Overconfidence feedback loop is that Hero/Savior/**Smug/Virtue** feedback loop - that loop of certainty. The binary's switch backwards and forwards between those. You see the middle more explorative path is one of hypothesis, mistakes and learning - the basis of all human development. Binaries don't make mistakes - we can see that in the politicians, feminists, magistrates, Media (ABC), human rights, universities and others. They tend not to learn and remain binary liars and abusers. They double down on their certain ignorance.

We can also see the idea of being authentic and truthful starts with trade and communication. You ought to tell the truth to be trusted and build cooperation. If you don't then the group cannot trust you and, in most societies, liars and *bull shitters* would be quickly discarded until they learned how to behave. For some reason - we have developed a society where liars and abusers have been promoted to high positions - I think based on the messiah/binary certainty problem - the need for binaries to delude themselves about the universe and invest their delusions in someone (Hitler, Mussolini, Khan, etc) who manifest that delusion for them in their **smug certainty** (I Ching). There also seems to be some kind of Neanderthal/Ape based joy in tearing others apart who you do not understand or disagree with - the Feminist/Mob type behaviors. Burning devils at the stake for thrills.

<https://humanistman.com/wp-content/uploads/2020/01/Corruption-Extremists-Feedback.pdf>

**Hannah Arendt The Life Of The Mind Volume 1 Thinking** Page 176 - "What we commonly call Nihilism .... Is actually a danger inherent in the thinking activity itself.... Nihilism is the other side of conventionalism, its creed consists of negations of the current so-called positive values, to which it

*remains bound.... But the danger does not arise of the Socratic conviction that an unexamined life is not worth living, but, on the contrary, out of the desire to find results that would make further thinking unnecessary."*

## Atomic Molecular Political Socialization

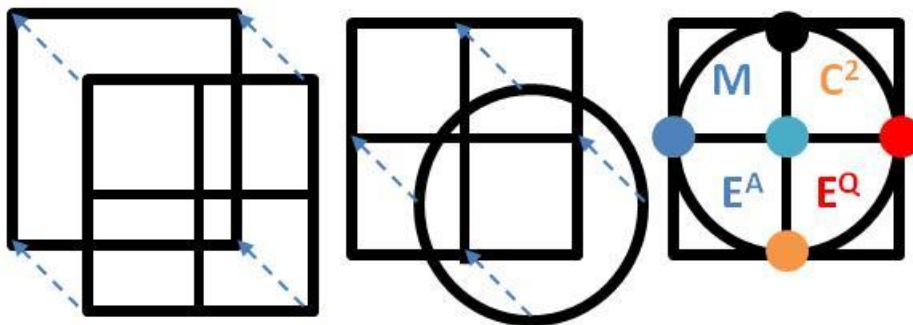

The Atomic philosophy is one of certain things bounded and certain. The universe is made of certain things. This is one extreme view that some believe.

We can image that cities are culturally different. Cities on trade routes become very tolerant, cities defending themselves become more dogmatic and certain, those with room to explore and freedom to think - well fed and nourished can grow and learn (Athens). Those cities surrounded by tsunamis, earthquakes and destruction learn about planning, construction and architecture (Rome). Those cities dominated by Tyrants (Huns/Genghis Kahn) become chaotic, dangerous and untrustworthy. Some don't form cities at all - roaming tribes.

We can assign those cities one of my 5 colours.

1	●	Pluralistic, Multidisciplined, Pragmatic - Unassuming Hero against Chaos
2	●	Architect, Planning, Doing - Competent Experienced Able
3	●	Explorative, Connected, Learning - Humanist Everyman (3s)
4	●	Constraints, Bounds, Patterns, Rules - Science, Dogma, Religion
5	●	Warning, Question, Challenge - Chaos, Unknown, Complex, Uncertain

For the purpose of discussion we can fit this to the Einstein/Fisher concept model into binary extreme positions and the continuums.

We can see which cities exhibit which characteristics through time and location. We can then imagine cities group together to form alliances and combinations to enhance their own positions and defend themselves or attack other groups. These combinations can vary by type and connection. There can also be cities which have no strong character - the blank ones. This looks like a more advanced form of John Conway's life program

This is like atomic, molecular, chemistry, experimentation, geopolitics and social engineering.

## Location

For as many years as we can see back - Homos have been leaving messages.

[https://en.wikipedia.org/wiki/Human\\_taxonomy](https://en.wikipedia.org/wiki/Human_taxonomy) We see cities, tombs, art going back many years. Caves hold many records through time but also artifacts of bones and rocks - arranged, shaped, carved and painted. Ancient settlements are not easily discovered in places like Africa, Asia, Australia or the Americas but rock art exists on travel routes. "We were here" becomes I am here, animals are here, we killed animals here, there was a chariot, we imagined a women (Venus), we had art and ideas. Some caves in Malaysia and Indonesia show no ancient human information - maybe they were not there yet or maybe it is yet to be discovered. (constant volcanism and tsunamis may have also had an effect)

We see the earliest human remains arranged in a burial site 78,000 years ago (**Panga ya Saidi** - Ancient Settlement(-78,000) [https://en.wikipedia.org/wiki/Panga\\_ya\\_Saidi](https://en.wikipedia.org/wiki/Panga_ya_Saidi) <https://news.artnet.com/art-world/archaeologists-have-discovered-the-oldest-human-burial-in-africa-1965501> near Mobassa -3.67664, 39.73544). The Egyptian Tombs are young by comparison.

Some records are "we died here" - fell down hole and died when we walked into a deep cave by mistake (laying next to animals who made the same mistake) or got killed and eaten by animals or got swamped by tsunamis, buried in ash, magma, snow, ice, or got stuck in mud, quicksand and California tarpits.

Cave paintings and rock art in general appear in many places back to 64,000 years ago.

[https://en.wikipedia.org/wiki/Cave\\_painting](https://en.wikipedia.org/wiki/Cave_painting) (**Maros Caves**, Sulawesi (-40,000)

[https://en.wikipedia.org/wiki/Caves\\_in\\_the\\_Maros-Pangkep\\_karst](https://en.wikipedia.org/wiki/Caves_in_the_Maros-Pangkep_karst)

<https://www.donsmaps.com/sulawesi.html> -5.00305, 119.69444, **Centro de Interpretación de la Cueva de Maltravieso** (-64,000) Cave of Maltravieso

[https://en.wikipedia.org/wiki/Cave\\_of\\_Maltravieso](https://en.wikipedia.org/wiki/Cave_of_Maltravieso) Neanderthal

<https://www.turismoextremadura.com/es/explora/Centro-de-Interpretacion-de-la-cueva-de-Maltravieso/> 39.45778, -6.36956)

Does carved bone represent "art"? Records go further back to bones and implements of various Homo species - records - hundreds of thousands and millions of years - time is less accurate the further way you go.

I like the travel routes art - people travelled through places and left messages on the rocks or piled up marking stones - directional markers - the signs for the traveler. As if to say "I know you are exploring and travelling - here are some breadcrumbs of our journey and information from our

adventures - what we learned along the way.” Roman Milestones on roads. Some just said “my hand is this big and has 5 fingers”.

*The routes, the paths - the ways to food and water - the ways away from danger.*

**Tassili n'Ajjer** - Historic Location(-10,000) **Rock Art** <https://whc.unesco.org/en/list/179>  
[https://en.wikipedia.org/wiki/Tassili\\_n%27Ajjer](https://en.wikipedia.org/wiki/Tassili_n%27Ajjer)  
[https://www.bradshawfoundation.com/africa/algeria/tassili\\_n\\_ajjer/index.php](https://www.bradshawfoundation.com/africa/algeria/tassili_n_ajjer/index.php)  
<https://www.africanworldheritagesites.org/cultural-places/rock-art-pre-history/tassili-najjer.html>  
25.81359, 8.13385 on the route between **Djanet** - Ancient Settlement(-10,000)  
<https://en.wikipedia.org/wiki/Djanet> 24.55415, 9.48542 and  
**Gadamis/Ghadames/Ghadamès/Cydamu** - Historic Settlement(-4000) (and the coast of Algeria)  
[https://en.wikipedia.org/wiki/Ancient\\_Libya](https://en.wikipedia.org/wiki/Ancient_Libya)

And the art in South America on the Trail up the mountains **Quebrada de Humahuaca** - Historic Road(-9,000) <https://www.worldheritagesite.org/list/Quebrada+de+Humahuaca>  
[https://en.wikipedia.org/wiki/Quebrada\\_de\\_Humahuaca](https://en.wikipedia.org/wiki/Quebrada_de_Humahuaca) <https://whc.unesco.org/en/list/1116>  
“Quebrada de Humahuaca follows the line of a major cultural route, the Camino Inca, along the spectacular valley of the Rio Grande, from its source in the cold high desert plateau of the High Andean lands to its confluence with the Rio Leone some 150 km to the south. The valley shows substantial evidence of its use as a major trade route over the past 10,000 years. It features visible traces of prehistoric hunter-gatherer communities, of the Inca Empire (15th to 16th centuries) and of the fight for independence in the 19th and 20th centuries.” -23.19972, -65.34888  
[https://www.google.com/maps/d/edit?mid=1dlqz\\_4B5\\_uqCAHD4SoJKGaPgRW69WByi&ll=-22.471554387281472%2C-61.48203375156248&z=6](https://www.google.com/maps/d/edit?mid=1dlqz_4B5_uqCAHD4SoJKGaPgRW69WByi&ll=-22.471554387281472%2C-61.48203375156248&z=6)

Mongolia [https://en.wikipedia.org/wiki/Altai\\_Tavan\\_Bogd\\_National\\_Park](https://en.wikipedia.org/wiki/Altai_Tavan_Bogd_National_Park) - By Altaihunters - Own work, CC BY-SA 3.0, <https://commons.wikimedia.org/w/index.php?curid=28515196>

If you are born and live with this constant daily reminder of the world, surrounded by camels, horses, cold, danger and a struggle for survival (Mongolia - Genghis Khan) - then your resentment of others in their fine cities surrounded by cargo cult type things of frippery and finery and their obsessions with themselves - their “victimness” (feminists, specially entitled victim) then destroying cities and murdering those you see as less than human seems to come easily. We see this in politicians, magistrates, feminists, human rights departments who selectively dole out “human rights” to their in-group and themselves (Helen Watchirs and the others in Canberra and Sydney human rights organizations), the media, schools, universities and the public service (Office of Women). Their specialness - special human (the woman) - specially entitled to lord it over demonize and kill others. The entitled victim becomes a violent killer.

Billy Hughes abused the Japanese after world war one with the white Australia policy - demonizing the Japanese and questioning their humanity. The Chinese fought against Mongols and the rest of the world building up thousands of years of resentment as being seen as inferior humans (the *yellow peril*) of entrenched racism and hate to the extent where the Chinese claim that every human fossil they find is the oldest on the planet and proof that the real source of all humanity comes from the Chinese - this combined with claimed intellectual and literary superiority (Confucianism) entrenches a smuglifuntist entitled victim narrative that we can only hope is not as extreme and binary certain as we see in A.C.T. Magistrates, Feminists and the women of the Labour party and the Greens.

Resentment builds.

With so many entitled victim groups around it is difficult to find the location of the humans. The “special” ones grab all the attention it seems. Humanity (Human, all too human) is not the celebrities, media personalities, politicians, legal professionals - the preachers - the pontificators. They are not dogs or “sentient” creatures that Andrew Barr legislates and Singer advocates for. These humans are spread far and wide - they are everywhere else and not well noticed or appreciated. They seem to live in a variety of places tough, difficult, easy - everywhere - the **everywhere human**. They “try” their best no matter what their capabilities and circumstances are. It is not (in a binary certain way) Mill’s utility, Hume’s “ought”, others “being”, “Godness”, “Virtue”, etc. It could be not, not, not (and more)? I recently donated some money to Erin Pizzey <https://www.youtube.com/watch?v=ctD-OrasjxM> because she has been telling the truth for a long time and is demonized for it. She needed money because the government had decided to legislate that her kind of car was illegal in a new “green” economy. <https://www.gofundme.com/f/help-erin-back-on-the-road>

Humanity comes from people like Erin. It comes from somewhere - maybe many places in many ways at different times. A Wheel, Tool, Carving and Art? The **ideas** of Greeks and Romans - the exploration but some pragmatism. The determination and cooperation of the Chinese. The brutal individualism of the Hordes. The Trade and negotiation skills of the Traders and their cities. Everything all combined and intermingled but adopted, tested, rejected, explored, changed, discarded, etc. Choice?

Stanley Kubrick combined Arthur C. Clarke’s Story and images with Richard Wagner’ tonal composition, “**Thus Spake Zarathustra**” and the allusions to *Thus Spoke Zarathustra: A Book for All and None* by Friedrich Nietzsche into a epic film moment where the sun (Ra) dawns over a Black Obelisk, as the apes are confronted by, and violently rail against, the **question it poses** - the music reaches its sublime crescendo and humankind awakens.

But there is more from the brilliant Arthur C Clarke [https://en.wikipedia.org/wiki/Arthur\\_C.\\_Clarke](https://en.wikipedia.org/wiki/Arthur_C._Clarke) . HAL (a pun on IBM) is the artificial intelligent machine programmed to keep people safe (alive) on the long journey to discover the meaning of the Obelisk. Hal kills people using his sure programming logic and Dave tries to stop him. “Open the pod door Hal” - “I can’t do that Dave” - becomes the feminist extremist tyrannical handbook catchphrase. Tyrants just do what tyrants do. They do not need to explain anything. Their **certain programming** is everything - all abuses are justified. Some people misunderstand this HAL as a malfunctioning artificial intelligence machine. Not at all - HAL is an analogy for programmed humans. The Binary certain.

**A Book for All and None** - Fred captures ideas of not,not and pluralism - away from binary certainty. I notice now that he noticed a bit more than I first thought.

Things change. Nothing is the same after that. You cannot “unsee” a black obelisk.

You have to (not aught) face it.

Like the idea that Romans, Carthaginians and Greeks could argue with Volcanoes, Earthquakes and Tsunamis by using Temples or hiding in caves. Berbers took on the desert and dealt with it’s reality. Vikings and Russians dealt with reality of cold and bears that kill you and your children. The dancing

bear is a strong human statement which goes back at least 10,000 years - *we tamed and controlled this killer*. Pet cats, Pet wolves, Boars, Horses, Elephants - but not Hippos.

Humans tend to understand suffering. They tend to understand more than the smuglifunts. They seem more aware of the human condition. They seem less sure and **more appreciative** of people and things around them. I think this upsets the smuglifunts because even with all their purple and "stuff" there is this complete vacuum where humanity might reside. Smuglifunts hate humans. Their hatred and abuse comes so easily to them.

How do you notice genius? You might notice something or even enjoy and be impressed - but how do you recognize the genius of something? Kubrick knew.

Spike Milligan (*Adolf Hitler: My Part in his downfall*

[https://en.wikipedia.org/wiki/Adolf\\_Hitler:\\_My\\_Part\\_in\\_His\\_Downfall](https://en.wikipedia.org/wiki/Adolf_Hitler:_My_Part_in_His_Downfall) ) saw humanity, firsthand. His scene in Monty Python's **Life of Brian** is genius. <https://oneroomwithaview.com/2014/09/26/scene-stealers-spike-milligan-monty-pythons-life-brian/> Others run after the certain religious relics, gourds and things - the mob - and Spike is left holding the shoe. He holds the scene and says nothing in particular and then walks off. This was not a heavily managed scene or dogmatic. It was Spike doing his thing. Not just a question - not American slapstick - not a big joke - not pun, word play, mime, sneer, smug, disappointment, hate, bile, love, etc - Just Spike doing his thing. Not enigmatic for enigmatic's sake. Something else.

I was thinking of contacting John Cleese and asking him about that scene but I suspect it does not really matter. John and Terry would not have over-directed Spike - their work together went back decades. Spike would have just done it.

## The Power of Ideas

The **idea of settling** was a big early idea - staying in one familiar place. Now **who would have thought of that?** The Fat, Dumb and Lazy left behind when the tribe moved? Stay or move? Or something else - stay a bit and move a bit. More ideas came. Education about how to do things, like read and write [https://en.wikipedia.org/wiki/History\\_of\\_education](https://en.wikipedia.org/wiki/History_of_education) (-2,000 Babylonian) but education was always at the hands of parents and tribes as well. How to fish, grow crops, tame horses, tend pigs, goats, etc. If you were clever enough you studied with clever people. Talent was recognized not mandated. Study with Aristotle - he set up a school and libraries.

But then the binary certain dogmatists took control - Religions mobbed into groupthink. The Levant, Mesopotamia, India then China. Later, Berber tribes across the top of Africa and the Arabian Peninsula. Trade allowed difference, appreciation, learning and tolerance to flourish. Arab traders got better at travelling across land as water sources continued to dry up - pilgrimages through tough deserts became the great annual sacrifice for binary certainty. Travel to sacred objects and relics became "the certain thing" everywhere - relics were hoarded and moved to special sacred locations. India, north Africa, Europe, Middle East - Sacred Objects, Purple robes, precious Stuff - metals and things. If you had a big building then you had to fill it with conspicuous displays of wealth. Awesome.

Meanwhile the idea of Bridges (Pont Du Gard, London Bridge, Bridges across the Rhine and Danube) Water (Dams, Aqueducts, Waste) and Architecture were on full display by the Romans as they moved northwards. The **solid bridge** idea **was a big idea**. Those rivers were difficult/impossible to cross at the best of times. Tolls were paid to cross the bridges - the investment earned its keep - Guards were stationed - choices were made - trade-offs were explored. Big ideas.

Buildings full of men writing, reading and learning taking in boys from surrounding places. Bright boys went to other similar buildings - Monasteries, Churches, Cathedrals - **talent was rewarded** with travel and more learning. Later Nunneries. The idea of learning was helped by the Greeks and Romans - the certain dogma and the binary certain devout was there to answer the questions the Greeks had posed and those **new questions** that anyone dared to ask.

The Huns and other tribal groups continued their raping and pillaging - the **idea of settlement** was difficult for them. Stealing everything - stealing women from villages in Ireland. Destroying "settlements" as if their existence was a big threat to their own existence. The Obelisk of the question.

The southern tribes had settled a bit - Religion was their big certainty across developed Africa in the north and Arabia. The Southern African tribes had no need for it in their abundant landscape of food, water and warmth.

Progressively, the learned devout were sent further and further into tribal zones to build and establish churches. Some were mountain caves but most were buildings in new areas - a new settlement rather than a building in an existing town. This used the Roman ideas and skills of architecture and city planning. Sites were chosen deliberately. Distances and road travel times were factored in to design.

Church buildings were the Big Black Obelisk to the tribal hordes. Why? There were no women and girls to steal and rape - just these men and boys building and writing. This became a big question to

the tribal mobs. Every time they burned it down the men and boys built it up again - backwards and forwards until the Mobs asked "why?" - and listened to the answer. Some were convinced and became devout and so things moved further out. Towns grew. France, England and some of Spain was earlier. Belgium and North into Denmark, Norway and Sweden via rivers, roads and settlements. Hungary, Bulgaria, Romania, Russia - took longer. The Huns and Tsars enjoyed their brutal tribalism and were probably well engaged with other hordes.

Rape, Murder and Pillaging was all they knew - it was the way things were always done. No Question.

But then it became more like a rush to certainty. "Why?" was no longer a question. How and when took over. Planning for wars, invasions, raping and pillaging. Binary certaintists became more sanctimonious and devout - as wealth accumulated - the Elites grew in certainty and judgement.

The questions had been "settled". **Why** was not needed.

Then Genhis Khan shook the devout with his answer "because I feel like it". The elites learned new forms of Barbarism and binary certainty. China suffered as much as the rest of the world - from Genghis and his family. The Moors saw their chance and took it.

Historians now write on Khan as if it's a mixture of good and bad. The idea of the ends justifies the means **is a dangerous and binary idea**. The idea that murder is justified because he was good with cats and sentient dogs **is a dangerous idea**. E.g. Eliminate the Rule of Law - allow terrorism - allow enhanced interrogation techniques - instant conviction and judgement - because he allowed women the right to vote? This is the logic of the virtue signaler. I can kill as many people and destroy as much of humanity as I like as long as I donate to the "Mob Cause" of virtue (me). **Indulge** me.

So the lesson of history is not the **certain judgement** in a binary kind of way. i.e. he was neither good nor bad but **exactly middle**??? because there was a mixture of good and bad (The binary three, equality - i.e. if there is good and bad then it is equaled out in the middle binary position).

### **THIS IS A COMMON MENTAL PROBLEM**

The Binary thinkers tend to prefer Rank, Order, Hierarchy than more complex analysis or thought. This manifests as a **positioning game** (virtue, moral superiority) and quickly becomes habitualized to **abuse, violence** and **corruption**.

"They are just as bad as each other" - really????

"Let's agree to disagree", "No-body is perfect" (hence we are all the same!!!), "It will all work out in the end", "fate will decide", "Oh well - what can you do?", "He/She Started it", "They are equally to blame"

Julia Gillard was appointed leader of her political party based on Gender - being a women and hence "a victim". The Political campaign was all around how progressive the Labour party was for promoting someone based on their identity - being a special human - a "women victim". Not talented - just "women" as if that was the very definition of talent. She eventually made prime minister of Australia and implemented social justice education reforms in schools to advance to causes of identity victims "women" and "blacks". Julia now parades around to country and the world

attending “women are victims” conferences on the celebrity bullshit circuit - usually sponsored by groups like the ABC, SBS and all kinds of virtue signaling organizations. She tells the story of misogyny and bigotry (of everyone else) against her and how she was a victim of men. Mobs of women and weak minded men sit around nodding and applauding Julie for showing “courage” at being a “victim” and speaking out against the evil “perpetrator” - being “strong” - a woman of the century.

So Julie seems to me to be incoherent and totally self-obsessed. Her assertion is that being promoted based on being a women to lead her party and playing to identity politics is how things should be and regardless of how corrupt she personally is and how much she has benefitted from her privileged existence in Australia and rising in a party dominated by feminism and corruption - she is **still a permanent victim**. This incoherence reflects the insanity of all feminists and many women (on average) around the world. Their brains lack anything much other than self, smuglifuntism, bigotry and binary hate filled thinking.

The Tyrants now control many countries, public services, courts around the world. Abusive Magistrates, lying Media, Universities, Tyrants everywhere. Fully corrupted, full of lies and personal abuse - Lead by people from the Labour party, the Greens, Women in universities, schools, courts, Politics and public services - all out lies, abuse and tyranny.

For all you Zealots and Binary certaintists - **Who wrote the book of certain Rules and WHY?**

Under what circumstances is it a good idea to murder people? Or in the case of the Canberra (Andrew Barr, Andrew Leigh, Alicia Payne, Gordon Ramsay, Tara Cheyne, etc) and Labour politicians (all of them) and Helen Watchirs the A.C.T. Human Rights commissioner - under what circumstances should the rule of law and the presumption of innocence and fair trail be abolished? In their case - in a Genghis Khan kind of way they have said to me (those who have responded at all) “When I feel Like it” or words to that effect.

What is the “right” form of bigotry and binary certainty?

What is an “acceptable” (they all do it) amount of corruption and lies?

At least I am better than Hitler?

John Howard and Alexander Downer knew of, authorized and endorsed prolonged torture of uncharged, innocent men and then abused them after their release - calling them “Terrorists”. The thought crime police watch thinking in populations very closely now - waving **that** torture flag around.

So it is not so much that these people are “unprincipled” for that would mean they would have to know what a principle is and then choose not to have it. They really have no idea of what a principle might even be. It is a perfect vacuum in their brains. It has always been based on “how they feel” - this is how it has always been.

## **The Binary Game Explored**

So I will try to explain it again in new and interesting ways - how exciting!

The positioning game means walking into a room full of people and claiming special status - "I am women". Shouting at everyone - "shut up" what would you know about "victim" you are a male. So all the males shut up and do what they are supposed to do. The women gather in mobs.

Then a disabled black boy walks into the room and say "Shut up" what would you know about being a victim. Then everyone shuts up and does what the new victim commander says. Gathering black boy disabled victims.

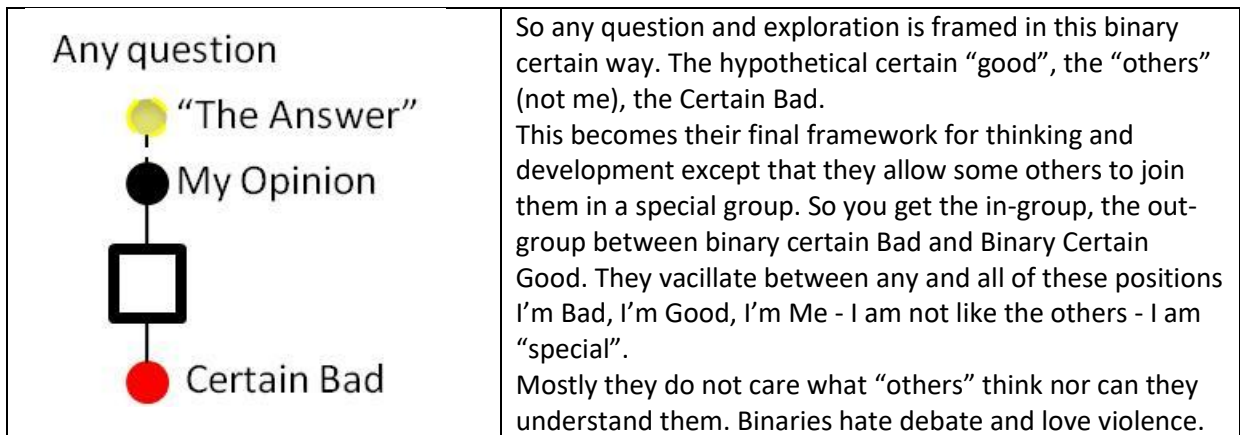

Then a man comes in and says "Shut up" - what would you know about "victim" - I worked 29 hours a day for all my life, got up 6 hours before I went to bed on the cold damp floor while our neighbors lorded it over us with their damp shoebox mansion, walked gazillion miles to work down a coal mine on my knees, in the dark with nothing but bat's piss to drink, crawled my way home to be beaten soundly for 6 hours eating only rocks for dinner to start all over again.

Constantly judging people also means the idea of good and bad - as long as I am better than Hitler - then I am good. You are Bad and Hitler. This is called the binary positioning games sort (rank order) which I will show you here. Jordan Peterson discusses the long evolutionary history of hierarchy - but people get stuck there and label it the "patriarchy" not realizing there more to come. They get stuck in binary.

So I always put myself at the top - others in a group and pure evil at the opposite end. This is still binary thinking but to binary thinkers this seems complex and like 3. Hierarchies build and group around this grouping, ordering and ranking type approach and can become quite complicated. Now the next trick is what the virtue signalers and other smuglifunts (Binary extremists, Feminists, women (on average) and weak minded men) do - the Pharisees and the Scribes, tyrant types. They OUTSOURCE GOOD (GOD) in a **BINARY CERTAIN WAY** and maintain their "special relationship" (at a price) with the ultimate binary certain Good.

This outsourced thing is very handy if you are the person in charge of “reducing earthquakes” for the tribe. The perfect scapegoat that allows you to get more resources for your temple, pray more, give you more money, sacrifice sheep etc. reward you when there is not an earthquake - see there goes another Non-earthquake that I stopped. When earthquakes happen it is because they didn’t follow my advice - they need to give me more. We see this in our politicians over the latest virus pandemic. They claim credit when people do not become infected with a virus (they saved lives) and when a person becomes infected - they blame the person and call out the mob to destroy them. Ever more totalitarian and binary certain of everything. None of these people think. None of these people think they are insane.

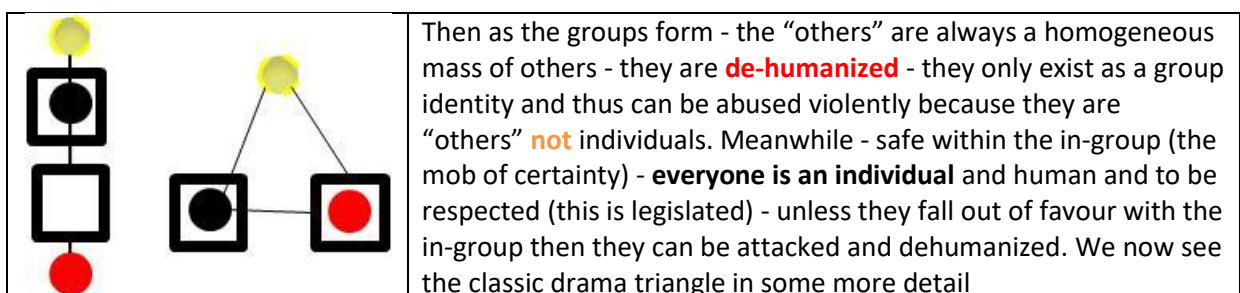

**Destruction of individuals for my own tyrannical virtue is mandated.**

You see the **Rush to Certain Judgement** model from these people as well. They glory in their pig-ignorance and swill. George Orwell knew about this. These people never really learn anything and they are very selective about what they take responsibility for and they are never accountable (protected by other corrupt elites) - most just do what they like - they just rush to **Popularity** and **Certain Justice** for the Mob.

**Responsibility Accountability Learning Popularity Justice** <https://humanistman.com/wp-content/uploads/2021/04/Responsibility-Accountability-Learning-Popularity-Justice.pdf>

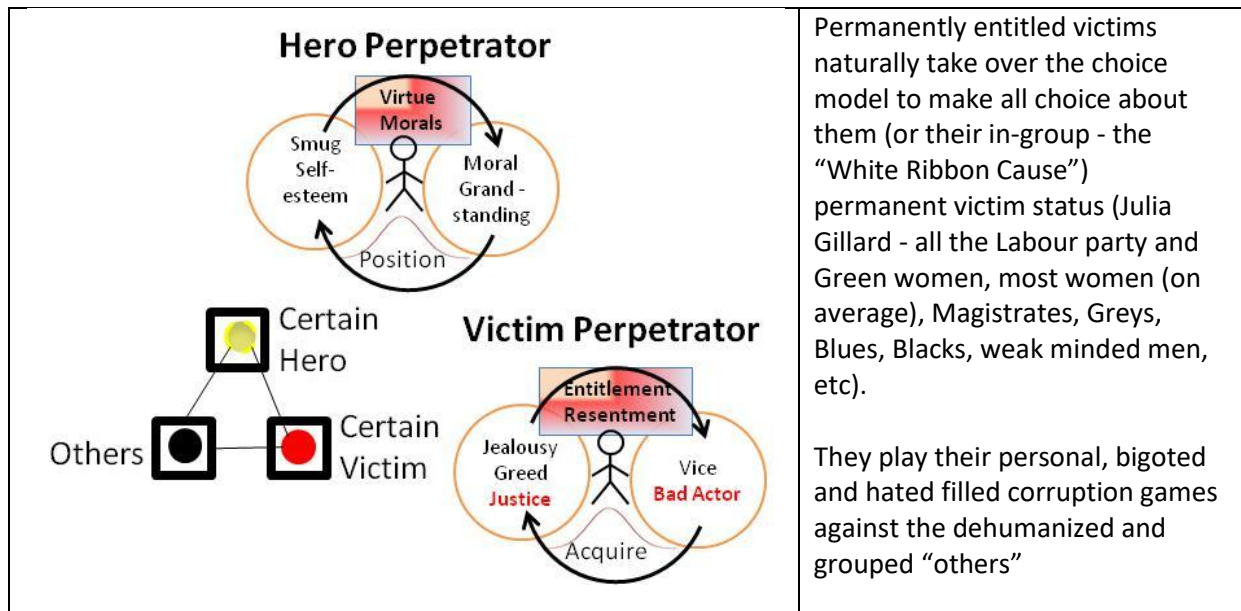

If I only do popularity and Justice all the time - who needs debate? Who needs to learn? The popular tyrant. If it worked Thank me - if not blame the others.

Psychopaths and Tyrants in general (Magistrates, Feminists in the Public service - Khan types), do not need to pretend that there is a thing called "The answer" which exists outside themselves. They just do or say whatever they like whenever they like for as long as they can get away with it. Some really do believe - in a kind of in defensible deluded way - that this "Certain Answer" that they have insight to is exactly how the world "should be" and death to anyone who disagrees with them. These "believers" cannot really debate anything - they are just binary certain abusers and haters. The problem then becomes what to do with these tribal binary certain humans? Can they Learn?

So Jon - where are the **Entitled Victims** on this model?

It looks very similar but the victims positions themselves close to Bad - things are "bad" for me. The Others are still in the middle BUT NOW instead of evil being Hitler - **Evil** becomes **Bad** - and is "What Happened" (**I was Hitlered, I was Eviled**). This model is a post-hoc model (the victim model) - the model above is the Choice model - what to do. So we have two frameworks looking nearly exactly the same - One is for **Choice** (what to do) and the other is the **Outcomes** and **Results** (What happened). (Blame,guilt, etc)

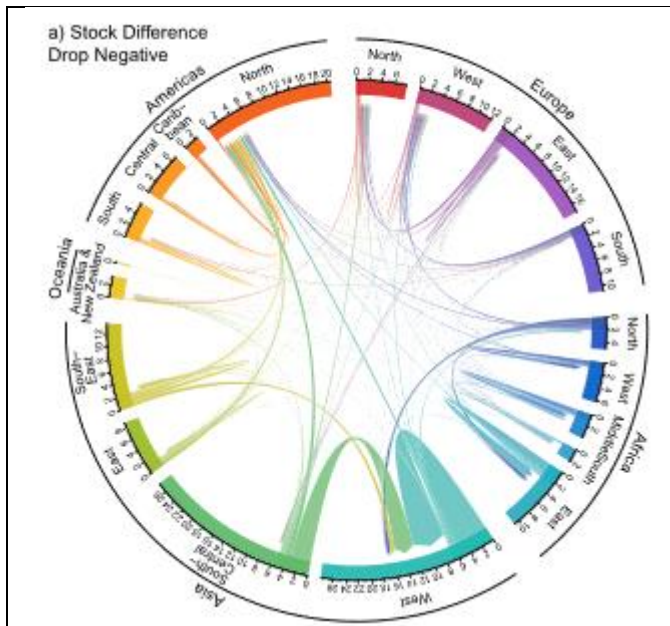

In all these binary games - the "others" the "perpetrator" the outgroup is not a player in the binary game. They **only exist as a group** for the players - hero/victim to play their personal game with. They have **no individual role** and are dehumanized into the generic "others".

Guy Abel has produced a WONDERFUL infographic to help with stepping away into threes. I am not sure if he invented the technique but what **you will notice is**: that instead of hierarchies, Euler type steps and graph theory **he has moved the points to a CIRCLE**. This is a really good way of stepping a little further into complexity and away from binary thinking. Because Circles are a different kind of infinity structure, visually, than the hierarchies.

<https://guyabel.com/> "I am researcher based at the Asian Demographic Research Institute and IIASA. I am also a Professor in the School of Sociology and Political Science at Shanghai University. Previously I worked at the Vienna Institute of Demography, the ESRC Centre for Population Change and S3RI at the University of Southampton. My day-to-day research covers estimating migration and applying statistical methods to better forecast components of population change. This website

contains posts mainly related to my research, including some information on my publications and use of R. The site is the successor to my WordPress blog which I had trouble accessing when in China.”

Copyright Abel, G.J., Cohen, J.E - Fair Use, Education not for profit, partial extract .

Notice how every possible (infinite number) of data points on the circle can be connected to every other data point on the circle.

<https://www.nature.com/articles/s41597-019-0089-3> Nature - Scientific Data - Open Access - Bilateral international migration flow estimates for 200 countries Guy J. Abel & Joel E. Cohen Scientific Data volume 6, Article number: 82 (2019) Abel, G.J., Cohen, J.E. Bilateral international migration flow estimates for 200 countries. Sci Data 6, 82 (2019). <https://doi.org/10.1038/s41597-019-0089-3>

If you explore Guy’s models online you can learn to use the model and explore things. You can ask yourself - what is this good for and how can I make it better? I think is some R code for it.

To highlight how the idea of turning an infinity line of direction into an infinity line of a circle see below. All of infinity is represented on the circle. You need to understand and appreciate what that means. (Columbus Egg).

The Infinite line of hierarchy becomes an infinite circle with all possible connections (or none at all).

Zarathustra can roam freely around infinity taking in the sights.

## The Occasional Tyrant

All of the people I have dealt with are individuals - I treat them as individuals even if they belong to a professional group. Nevertheless the plurality continuum is a sliding scale and not binary. Binary people whimsically switch in a binary way based on them self - their virtue and their bad acting.

We see this in Bill Shorten when his demonstrators are all individuals when he agrees with them but they are evil Nazis when he doesn't. He dehumanizes them. We see this with the ABC when they report demonstrators as far right extremists and BLM, Extension Rebellion, Women Mobs, etc as concerned individuals with rights and needing attention (in a mob like Grumpy McGrumpface entitled way - see Green/Labour women's constant attitude and face). We see this when the ABC reports Asylum seekers as **individuals who need special attention** (binary tyrannical certainty) rather than a general problem. We see this now when those who choose to get a vaccine for a Virus are called "heroes" and "saviors" for the group and those who choose not to are called "Deniers" and "Evil", "Idiots" and "far right".

We actually have now in plain sight, demonstrators who carry the signs "FREEDOM" and "CHOICE" are being demonized by the ABC, Politicians, Celebrity smart arses and other binary certaintists (group thinkers and haters) as "Nazis" and "Violent Far Right Extremists". Hardly anyone notices this abuse and groupthink - yet will accuse foreign countries or "others" of doing the same thing (Deeply held and violently protected incoherence). I suspect Australia may have more than 99% of people trained to be Smuglifunt "eilite", "special" binary thinkers. Not just Victorians, Magistrates, Politicians, Public Service, Courts, Police, Universities and media - but everywhere in every place.

It is based on the notion of a binary switch (**constant binary switching destroys principles**) between the rights of the individual or the group i.e. when a person should be treated as an individual and when as a group - "The Outsider" - "The Other" - "The Nazis". It is easier to abuse someone for "the cause" when you dehumanize them. The appalling behaviour of all the Magistrates in the A.C.T. Magistrates court - Karen, Bernadette Boss, Lorraine Walker, Robert Cook, Edwards and the staff - the Registrars, Philip Kellow and the rest - is all around this switch of dehumanization they do. Firstly they take away any view of you as an individual and group you into categories of victim/perpetrator. (group think). So as a male - you are **not an individual** AND you are grouped into a category of the **perpetrator group**. Women are grouped into the victim category **AND/OR** being a **specially entitled individual**. Legislated and supported by the "White Ribbon Cause" in the court system. Women are given money, support and set free. So while detainees at Guatanemo Bay were raped and tortured by Male and Female guards and other sentient dogs - Robert Cook put me on the stand to grill me about my paperwork as a deliberate abuse and de-humanizing method.

**Dehumanizing techniques** takes several forms - procedural abuse, staring and intimidation, ignoring (all of my emails letters and formal complaints) and failing to answer any question. This constant doubling down of the occasional Tyrant (Confirmation bias) re-enforces their Tyranny. They do not know how to stop abusing people and if they do finally wake up - it comes to a complete shock to them. They blame everyone else "no one told me". Bullshitters, lairs, abusers and corrupt.

Welcome to the human condition.

We see "denier" - climate "denier" (what ever that means), - the **passive aggressive violence and abuse** that women enjoy so much - Vaccine deniers, holocaust "denier", Right wing extremists, terrorists, etc. Someone who demonstrates for **choice** and **no mandates** is called a "vaccine" or a "covid" **denier** but if you demonstrate for **allowing for choice** (for the mother only) in abortions you are called a freedom fighter and a hero. If you demonstrate for **Mandated promotion** of Blacks and Women you are called a hero, progressive and inclusive and if you demonstrate for merit, free choice, no bias and no corruption - you are called a misogynist, bigot, hater, right wing, Nazi. Binary

thinkers switch their brains around based on groupthink, certainty and hate. Most binaries are as **thick as two planks** but much more capable with their violence and hate. The ABC is deliberately abusive in this way - there are Bad Actors, liars and abusers at the ABC from the board, management and staff - not just binary but double down, in your face constantly, abusers and liars - constantly demonizing others, calling out vigilante and mob behaviour and portraying themselves as “heroes” and “saviors” against the “evil” others - the dissenters of society who don’t go along with “our” Mob of certainty.

But Andrew Barr, Gordon Ramsay - all the men and women at the A.C.T. Legislative Assembly have gone one step further - they have entrenched the removal of fair trial from the legislation. They have changed the law to constantly de-humanize men based in the idea that all women are special individuals. Men are found guilty without trial and orders are made permanently against them which can never be revoked. Tara Cheyne recently rewarded Helen Watchirs and other tyrannical feminist, bigots of the A.C.T human rights commission with another 5 year appointment - what great public service jobs they are doing!! Registrars are exempt from review - they cannot even be investigated or questioned - it is a crime to tell anyone anything.

Office of women - more money for women - government endorsed bigotry, groupthink and corruption.

The A.B.C. do this in the media all the time - all the feminists in the media do this **rush to judgement** - elimination of due process and **instant binary switch** when someone is allowed individual “rights” and when they should be grouped as “evil men”. I will decide in a Tyrannical binary way. I am Justice!

The Commonwealth government has been going down this track for decades now “Human Rights” becomes weaponized and selective, The “Office of Women” as a permanent groupthink corruption statement, “Privacy” disappears, language is legislated (18C) in case people are “offended” - **smuglifunts**, all of them - RESPECT is mandated for some individuals but not others based on Andrew Barr’s and Julia Gillard’s “SOCIAL JUSTICE” education agenda which has left generations of Australians ignorant, entitled and abusive of “others” - ramping up hysteria and psychopathy which seems to come naturally to women.

Family law has changed to match the feminist view that women are entitled to all money and assets of men they are married to for 1 year. Women change the law in Child Support, Domestic Violence etc - this is all lead by Penny Wong, Tanya Plibersek and the other bigoted feminists in the Greens and the Labour party but **all women in politics** go along with this. Every man in world has to give women all their money all the time even when women do nothing. In fact if women do nothing the logic goes that you were happy for them not to work while you were married and so you should be happy for them not to work when you are divorced. Hence you are required to pay for their “upkeep”. Spousal Maintenance. Child support is Women support. Women can leave work and then claim child support - even if care is 50/50. All of this is obvious and happening all over the western world yet good women SAY NOTHING (how many are there - are they growing in number?) or whinge louder and many Men do nothing and say nothing (doubling down on ignorance or hero narratives). 100 years this has been going on and getting worse. The Lawyers, Magistrates and Legal profession generally - or as I prefer to call them - the human scum and weak minded scroungers of society - revel in the injustice, misery and graft any personal wealth they can accumulate. The

individual greed, outrage and entitled victim narrative has dominated for the last 100 years - fuelling all layers of widespread human corruption. Feminists don't like Harriet Taylor. See **Marriage assets – Analysis of John Stuart Mill and Harriet Taylor** <https://humanistman.com/wp-content/uploads/2019/12/Marriage-assets.pdf>

This entrenched “Self” focus of the narcissist (feminist, Binary extremists, Women, Magistrates, heroes, etc) has **fully corrupted the idea of the “public service”**.

No-one thinks that it is insane to have “a cause” inserted into the public service - Andrew Barr inserted “The White Ribbon Campaign” into the A.C.T. Public service at all levels. Of course Andrew is not the brightest person on the planet but he is in a position of power so he will legislate **on the world** - Sentience, drugs, Homosexuality, gender, marriage, land rights, Death, Conversation between individuals, Language, Aboriginal voice to the world, etc - anything he feels like - as a smug entitled tyrant. He is so “above” taking out the garbage, trimming the trees, recycling Canberra waste, getting rid of the blue green algae in the Lake, building and managing hospitals (with emergency departments). Abuse of humans in the name of his virtue and glory comes naturally to him - as it does to any tyrant. He celebrates his personal achievements at great publicity and expense (never a balanced budget - always more debt) and ignores questions or criticism - especially of his dearly held virtue. “Keeping you safe”, “Saving the planet”, etc - taxes are used to build hospitals, schools he declares (completely avoiding all the other things taxes are used for you might disagree with - look over here - focus on this instead. *They all do it, I am no worse than anyone else*).

Impartial public service is replaced with being **extremely partial** for **the certain cause** - as demonstrated by the “individual” in the position. Their individual virtue ensures the “cause” is progressed. I am partial in the “right” way to the “right” people in the “right” circumstances.

So Helen Watchirs and her underlings in the ACT Human Rights organization and all the other women and men in “Human Rights” departments - not only are happy inserting “approved” causes into the concept of public service and legislation but also too - their own causes come a lot more easily. After all - if you have one “cause” for “good’ then why not some more. (Think ABC Board, management and Staff - David Anderson - he knows what the “good” causes are)

Helen will publicly claim her partiality by signing public letters - along with other feminists using her public service title as a weapon.(see **Women Lawyers – Corruption – Feminism – Debate** <https://humanistman.com/wp-content/uploads/2020/07/Women-Lawyers-Corruption-Feminism-Debate.pdf> ) It used to be (good old days) that **conflict of interest** - was a sign of corruption - it was thing that had to be dealt with. Public servants were prohibited from expressing any opinion or supporting any cause by using their position or title. Their focus was their job and being impartial. NOT ANY MORE. Public servants are rewarded for using their job title (their position role) and work time supporting causes, for expressing their personal pig ignorant, hate filled and corrupt opinions. It

is is their job after all - them selves. *"As Chief Health Officer I don't want someone to die of vaccine A - even if it has been declared safe for use - it is my personal preference - I don't want to be upset"* - now appoint me governor general.

Corruption - nepotism - entrenched (promote more women). Helen - as a privileged women and feminist, is comfortable entrenching abuse (especially against men (the perpetrators)) and corrupting the public service in pursuit of her OWN PERSONAL agenda. She is the INDIVIDUAL who judges what should happen to others. All the feminists, women (on average 60% in the public service) and weak minded men - work to corrupt everything they touch for their "inserted" cause. Their personal virtue (individual) is rewarded by demonizing groups (men). The whole public service rewards abuse and incompetence - AWARDS people for their great PERSONAL work using their highly paid public service jobs (and the money they fling around as they go - sycophants, liars, corrupt, etc).

Katy Gallagher, Andrew Leigh, Andrew Barr, Zed Seselja, etc - **ALL** my local and federal political members will not acknowledge that I exist - respond to any email or question and keep doubling down on their dehumanization of the people they are supposed to represent. **Very selective** (not biased or corrupt of course!!) on who they work for. Just Like Bill, Tanya, Penny, etc. So habituated to dehumanizing individuals (decades now) - for the cause - they have not discovered what it might be to be a decent public servant doing their jobs - let alone be "human".

The public service is fully corrupt - feminist causes and weak minded uneducated people are hired to give 'diversity training' and "the latest cause" instead of working or solving difficult problems that do not involve their own personal agenda, virtue signaling and groupthink. Work is outsourced to contractors and the Army. The public service "publicity and media" (not just at DSS) officers spin the bullshit as fast as they can feeding corrupt and pig-ignorant media (group think - dehumanize the individual) and ignoring individuals in the population especially those who question.

So the occasional Tyrant decides who will live or die, who is an individual and who is not, etc - on a day to day (or entrenched groupthink) basis - These tyrants don't think. They don't think they are tyrants, they do not know what tyranny is - until it happens to them and then they go "oops" why me? And even if they are the occasional tyrant they balance they up with petting sentient animals, kissing babies or being 'nice' - in a PERSONAL kind of way. They fail to notice history and the rest of the world in some kind of objective assessment way. What happened to Porter, Depp, Paul McCartney, Greg Norman, Lindy Chamberlain, Cardinal Pell, etc and all the others throughout history will never happen to ME. Really?? You think so - well that is OK THEN isn't it??

We see this blithering incoherence and ignorance in people like Katy Gallagher - a feminist and "individual" with entitlements. (Most women in politics, media etc are like her in this way). So her children catch a cold. Show goes on national TV to complain that they caught a virus. Remember - she is a high level politician - she regards herself as intelligent, educated and rational (like many women like her do). She regularly interrogates others in senate committees for their actions. So she is not trying to be obviously stupid, insane or self centered - it is just that she (like most women in public office and Australia in general) simply has **no idea** how she behaves or what things mean. We see this in politicians (men and women) around Australia - this deep ignorance and self possession.

Katy wants to **blame someone** (who is the perpetrator?) - someone **must be there for her to blame** for - after all - **SHE IS THE VICTIM** (like Rosie Batty) as tears rise and hysteria builds. *"Wont someone think of the women and their children?"*

But it is more than that - she works in government systems and cares not about my existence as a human being or someone she is supposed to represent or how many men and boys her governments, policies and hate filled political agenda has killed throughout the years. She cares for herself, **always and only** - this - in her mind is her main role as a highly paid public servant - kill the right people. She knows who the "right" and deserving "victims" are. Give me a call Katy - maybe we can catch-up for a chat? You are my local member after all - invite that weak minded Zed along as well.

Women around Australia walk around with this same mindset on a daily basis on a constant feedback loop ("Kill all Men", "I am the Victim here") - reinforced every day by smuglifunts in the A.B.C. and other media and the cackling women who form groups in coffee shops living it up on the welfare state and huge superannuation and divorce payouts they sponged from men they manipulated throughout their lives (with the support of the Scribes - the legal scumbags)

This entrenched binary smuglifuntism is widespread now, Police smashing heads into pavements, spraying, pushing, kicking, handcuffing, intimidating, threatening, abusing, searching, demonizing - everywhere. Politicians lying, abusing and dehumanizing protestors. Idiot media running feminist campaigns and calling everyone else "Nazis" who do not agree with their blithering incoherence. Courts and magistrates abusing people, abusing due process, corrupting the law, the process and the judiciary. The High court dominated by feminists and identitarians - no brains, no skill, no education - it is all about "identity" - *isn't about time we had a disabled, gay, trans, black, high court judge?*

Collusion between elites in politics, business, public services to continue and enhance the corruption and lies. Tanya checking her networks to plan the next strategy of abuse "for the cause" - who needs **authentic truth**? 50 years of "progress" for women - our great certain bigoted, hated filled cause. Schools taught by barely literate man haters teaching "respect", gender theory and how to have sex for babies and children. Maths teachers teaching  $2+2=5$  because they know no better and barely speak English. Constant bigotry, hatred and smuglifuntism. The Police state, feminists, the cause, self, virtue, determined ignorance, avoidance, Grumpy children throwing public tantrums for ever, princesses publicizing their own "victim" narrative to adoring and indulgent media. Kings and tyrants telling the rest of the world how things should be for everyone. I'm rich/celebrity/actor/singer/TV personality/professor - I am important! Who needs an independent "public service" when we have such individual talent?

Instant outrage, Rush to judgement, Binary Thinking, Smug, Abusive, Ignore debate, dehumanize opponents, violence, greed, corruption, vacuous celebrity, 'virtue', bullshit and deeply held and protected ignorance.

Girls trained to lie and be the victim, rewarded by charities, courts, media and public services - men told to kill/torture/lie/corrupt for justice, vigilantism, instant justice, destroy legal systems and safeguards, more lying psychopaths promoted and rewarded (courts, magistrates, public service, politics, media, universities), media trained to ramp up the rhetoric and lies and rewards for idiots, celebrity "commentators", professionally opinionated, ignorant and corrupt - sociopathic, social

justice engineers like Andrew Barr destroying humanity via “education” campaigns and other means for the sake of himself - his utopia of sexless/gender changing (incoherence dominated), drug filled, sentient dogs, animals and pigs on two legs all walking around in “utopia” learning what the next great “cause” is from the schools and universities designed by the “dear Leader”. Don’t question - certain “God” is in the room.

Tensions rise, violence, distrust, lies, mental illness, attack, constant personal attack, snapping outrage, blame, delusion - a lack of truth, celebrity bullshit, abuse of individuals for the sake of “causes”, smug smiling elites - comfortable with their continued ignorance and abuse, pontification, lecturing, no exploring, no experimentation, no debate, no responsibility, no accountability - institutionalized by abuse in schools, universities, courts - children with no-hope - just constant smug certainty of ‘virtue’ and entitlement.

Brutality, lies, delusion, constant incoherence, bias and no accountability of politicians, ABC, media - broadcasts and resonates around the world - the constant feed of bullshit and a call to violence, outrage and crime - if they can get away with it then why not us?

If you are poor just steal, lie, shit in the shops, burn everything down - you are the entitled victim after all - the heroes give you permission to do it - you will never be held to account. Magistrates love women and allowing them to lie and destroy everything and everyone they can. Lawyers rub their hands with greedy glee.

See how wealthy we are - look at all my money and stuff - I must know what I am doing. Who are you to question me? I’m the victim here (says Penny Wong). I’m Australian of the Year don’t you know? Don’t you know how important I am? Have you seen my medals of honour? See how I am honourable? Yes - your honour, your worship.

It is not that the Emperor has no clothes, it is that the Emperor has no genes (get it? - tish boom). Cro-Magnon’s revenge, Neathderthal’s folly.

Dehumanization and abuse of those you disagree with. China Dehumanizes whole populations by gradually removing a country off the face of the earth by persuading every other country to ignore and un-validate human beings very existence. Bribes, promises, lies, threats, corruption - weak minded men. Taiwan is not a country on any authorized Map - **See** - no-one cares about your existence - **See** no-one notices your name or that you exist - Now it belongs to us and we can kill as many humans as we like. Professional brutal, **de-humanizing**, violent extremism that even John Howard and Billy Hughes would be proud off - as long as the “cause” is great, hey John?. **See** - the media is on our side - we manage the story - the truth. **See** - we locked you up without trial and hide you away. **See** - we make orders against you and then hide it from the media - your story will never be told - you may as well curl up and die. **See** we can do what we like and no-one will stop us or even care. You cease to exist but our names will live in history - we are the virtuous immortal.

ABC claims that things will even out “in the long” run; that it is not avoiding Men - it is just concentrating of Women’s issues “to balance up things over time”. We are not biased! - How dare you (18C). We will get to men eventually - it is just a matter of time. Go stand in the queue until we feel like it. Trust us. We are definitely not corrupt but we know “others” are. Human Rights organizations say things like “it is not our focus at the moment - we are focusing on Women and

Children". Look in to Jillian Trigg's or Hugh deGrester's eyes to see the vacuum. Sorry I'm a bit focused on myself at the moment - my virtue, my cause. My daily focus is everything to me.

State leaders telling everyone they are "good" boys and girls for doing exactly what the dear leader wanted them to do - for obeying the leader. I am so proud of my children - my dear little ones. Demonized and blame the bad boys and girls - attack the others - call out the Mob, police and media on the "bad" ones. Go on - you can have a free kick as well - we all enjoy a bit of violence and demonization - don't we my fellow apes? Keep obeying my tyranny and I will tell you how "good" you have been (I will reward you if you support my methods) - remember you elected me to be a Tyrant - that is my job after all. My certain tyranny and cult worship is what you wanted wasn't it? Mussolini wasn't an aberration - it was a template.

Do you remember noticing everything when you were 3 and 4? Everything was bright and memorable. When did you stop noticing and what replaced it? What exactly went on in your head when "Kill all Men" became something you ignored? Did you fail to notice or Did you embrace the cause? I was concentrating on women's issues - that was my focus (Bigotry and hatred) and will always be - I am determined to fight for the certain "cause". If your child came home and told you "Kill all Men" what would you do - how would you react? Would you seek to get them employed at the ABC? Would you award them with Australia day medals and parade them in front of the media as "prophets"? Would you assign them as diversity and equity officers, human rights commissioners, Attorney Generals and Magistrates?

Mark Dreyfuss and Christian Porter both ignored me - along with all the other attorney generals and politicians in general around the country - full of themselves. It is not our job to notice. OOOPS. It happened to me says Christian!? Who would have thought that someone like me could be treated so badly by others and the system I created?? Dreyfuss - from Melbourne - is part of the legal community (fully corrupted) will always struggle to overcome the smug, self satisfied, superior attitude that comes so easily to the entitled/victim/hero binary types. Ignoring, doubling down on NOT noticing, determined pig ignorance. That Jew on the ground will never be me. That Coolie in Nanking will never be me. They are not real, they don't exist, they are not my focus at the moment. I have my certain causes - who needs humanity?

Whistleblowers demonized, locked up, processed in secret by Canberra Magistrates and hidden away from view. Police state expands across all domains (information, mobile phone usage, movements, words, ideas, DNA, genetics, health, saliva test ,protests, questions, torture, rule of evidence, etc), reporters chopped into pieces and taken away in suitcases out of government embassies. Whistle blowers hiding in Embassies to avoid assassination. Questioners and Opposition poisoned in Europe, threatened, families held as hostage, threats, intimidation, passive aggression/actual aggressive - smug laughter and complicit behaviour and support, constant abuse and delusions of "society" - men in expensive suits with neat haircuts - women parading "heroic victim status" and victim medals - wheels spinning faster - bullshit flying faster and further.

Idiots in politics and around the world thinking it is just an aberration, just a few bad apples, not a widespread breakdown, corruption is under (our) control, we have the "right" amount of lies and corruption, women/blacks/trans/etc are not hysterical violent mobs - they are victims, groupthink is good, who needs humanity when you have victims to focus on? **SO WHAT** if we are constantly fully biased, incoherent, lie all the time and demonize and abuse people. **SO WHAT** if we change laws to

keep the mobs happy and destroy humanity? **SO WHAT** - if we keep handing your money to whinging mobs and professional certainty and virtue bullshitters? Ad Hominem and Reducto Ad Absurdum was an instruction manual wasn't it? Not a warning but a detailed instruction on how to debate?? 1984 was also an instruction book - not a warning. We know how to read! What do you think we are? - stupid apes? I have 6 degrees from the ANU in feminism - all my published research is valid and if you disagree I will get the High Court to cancel you and make you a pauper. I will RID the world of alternative ideas, debate and research, burning books as I go. The only reason you do not understand it is because you are a hater of women. "Kill all Men" says the ABC and all the women in universities, schools, courts, politics and the public services - and give us moré money while you do it.

Don't exaggerate! You are full of hubris and fullsome hyper-bole says John and Julia. I will tell what to focus on and when - social justice and my individual Virtue, says Julia - the certain good has finally been found. I will tell you what makes **logical sense** say the politicians and their advisors.

A Wasteland - in every sense of the word. Bereft of an "idea" or desire for humanity or intelligent debate - just constant abuse and smugliffuntism. Dante wasn't even close.

## The Haunting Idea

I ate too much chocolate and dairy last night so my sleep was disturbed by my sinus problems and breathing difficulties. I was in and out of various dream states all night. I have noticed this more as I read and develop my mind I can recall dreams and be in various half awake half asleep states with some kind of connectivity and exploration. The dreams I had last night were connected to fear - I could feel the fear and would rouse and wake to clear my breathing and then try to go back to sleep. I had watched earlier in the evening the Youtube interview by Jordan Peterson [https://www.youtube.com/watch?v=kxMj\\_u5fQH4](https://www.youtube.com/watch?v=kxMj_u5fQH4) Enhanced Interrogation Techniques | **Mohamedou Ould Slahi** | The JBP Podcast - S4: E:49 172,585 views Oct 5, 2021 - where Mohamedou explained the torture and abuse techniques used by police and armies in several countries - including Canada, USA and authorized, approved and encouraged by John Howard and Alexander Downer. This was an horrific account and aligned with Nanking and Nazis "Banality Of Evil" - how easy it is for societies to become violent, brutal and throw out all laws and humanity. The same we see with Feminists, binary extremists and the current psychopaths around the world. They too doubled down on the abuse and lies after he was released and the abuse continued by legal, media and other processes. They same as we see in the A.C.T. Magistrates court and public services, politicians, A.B.C. etc. The same way Downer (supported by this colleagues and the media) abused Hicks after he was released.

My dreams were **intense fear** but **unspecific** (I was exploring them) - there was emotion in play when all of a sudden I posed some kind of question. I am still deep in the dream state. This question was not even put into words but it may have been something like "what does all this mean?"

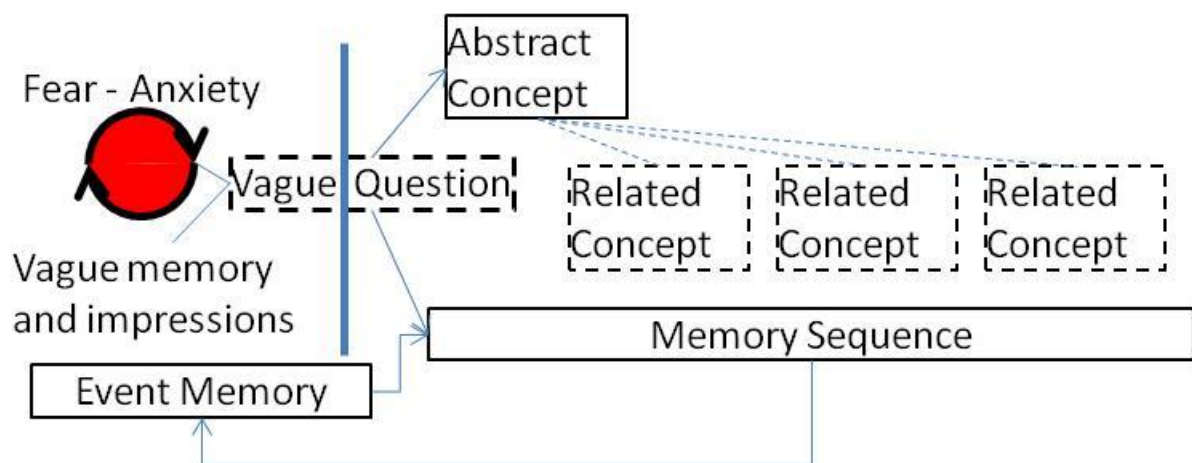

Something like - *why am I having such a strong reaction?*

As soon as that idea was posed - the "fear" or "reaction" went to another place. It was like it was moved from the fear dimension into some kind of abstracted space and stored - like in a memory location. It felt like my brain had made a specific space where this fear object could be examined and

explored more easily. All this happened very quickly and there was a feeling of relief but also and “ah ha” moment a kind of awakening. I was immediately aware of the new object and two quick connections attached themselves to it - “ghosts” and “haunting”. My rational brain validated those two early connections very quickly. This was all done very quickly and I awoke slowly to examine the process trying to keep the fear object in view as well. Keeping the feeling of fear front of mind became more difficult as I awoke until it became a memory of the fear itself - which was a different record than the “haunting” object which was the abstraction out from the feeling of fear.

I cannot find this fear feeling in my memory. I do not know what it was specifically. To put this in perspective - I have a fear of heights. All I have to do is imagine me standing on a house roof or the edge of a cliff I can immediately invoke the fear of heights but I cannot consciously re-evoked the fear in my dream.

So I had several things going on. I clearly remember the moment the fear went from feelings into abstract thought. Then I had two things happening at the same time from then on - the creation and exploration of the abstract thought - the linking of further abstractions. But also too a memory of the sequence of events.

So this Abstract idea manifested itself in memory and was immediately explored by hypothetically related ideas and potential links were examined. It was like it needed a sufficiently well connected home to reside in. So I can now recall the idea and its initial connections and where the idea came from and the memory of it’s creation. I have to be careful not to corrupt the memory of the event and redesign it in some kind of preferred way (Smart Professor/ Feminist victim/ Cogitative Bias) - I have to explore what happened as best I can. Now this might not seem much to you - or all so very obvious but there is something quite deep going on here - the creation of an idea - where do ideas come from how and why. Another related idea is being a various mind states - Awake and asleep and the inbetween.

You will notice that I have essentially provided a model (above) for the **Notice (I), Question (What) and Declaration (is)** sequence, the observer effect, “I Think Therefore I Am”, etc. This was explored in many of my earlier documents (see my **meta frames** page and documents <https://humanistman.com/home/frames/meta-frames/> ). The Observer notices some thing. I Explored this in **09 Humanism – Bad and Good** <https://humanistman.com/wp-content/uploads/2019/04/09-Humanism-Bad-and-Good.pdf> - remember Bad Comes First! **“Humans**

*who claim to know what “Good” is better than anyone else does are ignorant of the complexity of life, need to see themselves as better than others or do not want to be exposed to the complexity of choice.”*

<p>Notice</p> 	<p>When did you first notice something? Can you remember?          When did you first notice that you were noticing something? Can you remember?          When did you notice recursion? Can you remember how you managed to deal with it?</p>
---	--

Now having put this thing in my memory and away from my cycles - it becomes a stored a linked thing. I can retrieve it and examine it some more and connect to new things that arise. This becomes an early manifestation of **CHOICE**. I can **actively choose** - using my cognitive self - my supervisor - my conscious awareness - to examine this stored object when (time) I determine. I can use it in conversation. I can let it sit for a time. I can ignore it. It might grow in connections as new things happen. It might become more important and emphasized over time. I can write about it. I can forget it, change it make up a whole new story, re-write it, turn it into a story worthy of Ovid.

I am aware of the feeling of different brain cycles (states) and can usually recognize (I am spending a lot of time in high energy brain states lately) the shift of focus between states - Alpha, Beta, Theta , Delta <https://www.scientificamerican.com/article/what-is-the-function-of-t-1997-12-22/> - although I would not have called them that - I know what they feel like. Anxious, Thinking, Meditating, Sleeping. There are many more states - heightened exploration and creativity - singing, running, doing , sex, playing and many others. (See Ned Herman and whole of brain model <https://herrmann.com.au/> , <https://thepeakperformancecenter.com/educational-learning/learning/preferences/thebrain/hbdi/whole-brain-model/> ) Ned’s models are more about preferences and tendencies in organizational design. The basic idea is we all have differences in skills and tendencies. I am more concerned about the problems with binary thinking and cognitive development more generally.

See Neuroscience Letters Volume 711, 15 October 2019, 134401 **Coupling and Decoupling between Brain and Body Oscillations** - Elie Rassia, Georg Dorffner, Walter Gruber, Manuel Schabusa, Wolfgang Klimesch, <https://www.sciencedirect.com/science/article/pii/S030439401930504X>

These different cycles of activity within our brains - our different frequencies (from anxious to relaxed) - are different and many. You will often hear people say “Let Time Pass”, “Time Heals All” - these ideas are related to moving from the highly anxious rapid oscillation cycle of fear and anxiety and through other states.

These **frequencies** in various places vary - mostly in integer relationships (4,8,12) but, also too, the **amplitude** of the cycles vary as well - usually (but not always) in integer type relationships. So we monitor things up to 4 cycles and then connect the other parts as fear/anxiety ramps up and **things need to be done** - decisions need to be made. This fires up cycles of activity across the prefrontal cortex areas and through the layers of interconnections in the brain using more cycles and connections until some choice is made and the brain can ease down the cycles. The whole body gets

fired up with messages, chemicals and bodily changes happening all at once waiting for the next big message from the Fat controller. Mitochondria are flat out providing the energy for the cells.

But there is more to it than that - there is a realization that if you monitor the interplay between the various cycles of activity you can find connections and patterns between the frequencies themselves which can be used to work on more difficult problems. The Idea of “sleeping on it” is allowing these cycles to intermingle and allow your observer higher brain function to notice when things are connecting.

The amygdala and related lower brain areas are small and well connected to many things and seem to operate around 4 Hertz - this a major connection to other cyclic areas of the brain and the 4 Hertz cycle appears as an integer multiple in other areas of the brain and brain waves cycles - 4,8,12,35 and also integer relationships in amplitude. But we also have deliberate out of phase interactions of various activities in the brain (non-linear) which represent and more explorative and chaotic exploration of information and connections. We **can choose** to be non-integer ratio based (Harmonics?) - may this allow exploration over longer cycles?

**An Aside:** You will notice my bias of 5 being about limit of complexity (chaos, etc) - we see usually binary combinations of wave patterns at work. Notice that if you double 4 cycles you get 8. Add 4 to get 12, Double 8 is 16 , double 16 is 32 - so we get some “levels” within these changes which stop between 3 and 4 doubling of the starting level.

So if the monitor functions of the brain can control (to some extent) the **FOCUS** or the amplitudes and frequency “choices” and the interplay then we **can allow** the weaving of complicated wave functions (disharmony) across areas of the brain to explore connections and generate more “knowledge” or options connected and stored in memory. This is also recognized when people need to “settle down”, “go for a walk” or “give it a rest” - “Sleep on it”

For me this experience was not one of a pure change of brain wave state - although that may have been part of the picture. It seemed something more - something else. It may have been me noticing the lower level functions of my hippocampus in making some kind of question or choice.

## The Idea of Haunting

The Japanese manifest spirits and ghosts in places, objects and things (relics). They can be haunted (reminded) of these things on a regular basis. When they visited new places they will check the history of ghosts. The reminders. The haunting reminders - the motivations and ideas. Talisman, Beads, Habits, Objects. Binary certainty and Groupthink invades this - today's Pagan is the next Tyrannical Empires certain good. I will tell you what to think and what to value in your heads! **My Truth - My** lived experience shouts the celebrity priestess surrounded by adorants.

Volcanoes, mountains, rivers, weather, storms, lighting, thunder, earthquakes, tsunamis, floods, flowers, animals, trees, rocks, signs, mile stones, sky stones, season stones, rock art, things - what am I missing?

Figurines, artifacts, temples, art - all reminders of the complex into manifested abstract form. Remember this!

Alexander prayed to the god of Phobos (fear) as a deliberate act to a manifested object. He was praying in hope for possible futures - that he might make good choices.

[https://en.wikipedia.org/wiki/Phobos\\_\(mythology\)](https://en.wikipedia.org/wiki/Phobos_(mythology)) The Son of Man and Woman -

Ares(Mars)/Aphrodite(Venus) - the product of life itself. Deimos (dread) was the brother of Fear

[https://en.wikipedia.org/wiki/Deimos\\_\(deity\)](https://en.wikipedia.org/wiki/Deimos_(deity)) which turns the feelings of fear into choice and consequences - outcomes.

This idea was step forward in human development. A Haunting Reminder.

## A Tentative Exploration of Justice

Hannah Arendt's Banality of Evil shows Adolf Eichmann with nothing there - no answer to his behavior.

I have written to Andrew Leigh, Andrew Barr, Gordon Ramsay, Helen Watchirs (various women), ABC, Courts Politicians (all of the Senate and A.C.T. legislative Assembly) for many years now about how myself (specific and detailed case details and legislation) and my son (and many men around Australia) have been treated by government (schools, courts, universities, public services, police, media, etc - for decades) and asked "why"? This simple question has been ignored and people have been publicly torn to shreds by the media and politicians for daring to ask "Why". The Labour Party and the Greens have destroyed legislation, corrupted governments and public services for the cause of "women" demonized and abused men and doubled down for decades on their constant abuse. Why? They continue to de-humanize by ignoring me and failing to do their public service jobs by dealing with the valid issues I raise. They are fully corrupt and double down on their corruption.

The Labour party and the Greens for many decades now have ensured any enquiry into the question of family law or human rights is dominated and controlled by feminists and women and that men are excluded, demonized, abused and ignored. Why?

Many elites have laughed, danced, masturbated on politician's desks and shrieked with joy as they danced on the graves of people they abuse - all they while claiming "we are the real victims here" - Why?

Politicians have virtuously given money to themselves and their in-group from the public purse and wallowed like smug pigs in their corruption. Why?

Now, what I would not do (as a rush to judgement) is - raise a Mob of feminists, man-haters and binary certaintists to storm parliament and “demand Mob Justice” or like the ABC, run constant mob vigilante media campaigns controlled by Ita and David Anderson - I would do something else.

I would not declare them guilty without a trial or even having been made aware of the charges - like Registrar Edwards did three times to me nor would I instruct the court staff to procedurally abuse them (like the A.C.T. Magistrates (Walker, Boss, Cook and the others) and their staff did to me) - no - I would treat them with the utmost respect and give them plenty of time and support to work on their answer to the question. Eichmann struggled of course because there was nothing there - Hannah calls it “Banality” but I am not so sure.

Why?

Take your time - explain your selves.

Maybe your children can learn from you.

## Salt and Preserving Food, Metals - Trade - technology transfer

Lots of historical salt mines across the world - not just the metal age (iron, bronze, etc). Salt was worth its weight in Gold. Curing animal hides, preserving food (fish, meat), Alchemy?

[https://en.wikipedia.org/wiki/History\\_of\\_salt](https://en.wikipedia.org/wiki/History_of_salt) So we have human cycles of Water (H<sup>2</sup>O), Salt cycles (NaCl ions), Air (N, O, Ar.... CO<sup>2</sup>), Fertilizer (Bullshit)

<https://www.sciencedirect.com/topics/chemistry/superphosphate> Phosphorus, Calcium, Nitrogen, Sulphur and more. Humans use many different elements in their bodies in cycles - e.g. Carbon, Potassium, Magnesium, Zinc, Iodine, Flourine, Silicon, Gold, etc. Things move around.

<https://link.springer.com/article/10.1007/s10533-009-9306-z> Open Access Published: 18 March 2009 **The human carbon budget: an estimate of the spatial distribution of metabolic carbon consumption and release in the United States** Tristram O. West, Gregg Marland, Nagendra Singh, Budhendra L. Bhaduri & Adam B. Roddy *Biogeochemistry* volume 94, pages 29–41 (2009) ..” *Almost all carbon in the body is found in fat, protein, and glycogen, with smaller amounts of carbon in bone mineral and lipids (Heymsfield et al. 1996)”*

Precious stones, Different things from far away, Gold, Silver - the Plunder moved from conquered city to the next plundered city in cycles. Baubles, Bangles and Beads, Jinga Linga (Kismet)

<https://www.youtube.com/watch?v=YcNANQWgGQo> Who knew they really needed some Frankincense from Oman and they needed to pay a lot of money for it?

Words, documents - values changed. How was an idea of bridge or stonework valued or exchanged? Did education cost money - How to do things? Good educators were respected, rewarded and paid.

**Value** was invested in ideas - objects became “relics” - not a Talisman or general god form - THE ONE AND ONLY special god form object. **Specialness kept developing** - by the enjoyment and for the profit of the Pharisees, scribes and sycophants. Specialness developed into big business.

## Escaping the Binary with Jacob's Ladder and Lightning

A Positive Charge separated from and Binary opposite charge generates tension in the real world as charge builds - a constant fight between who is more negative or who is more positive. Lightning is the same thing - the build up of tensions and release - the spark of chaos - Prometheus. The path is chaotic and **not a fixed third point** - we call that fixed point - wiring - the binary certain path (transfinitely).

We enjoy staring at fires. Chaos and our escape from fixed choice boundaries.

Hemmed in by binary choice or no choice at all is not humanity.

## Decaying Temples of Certainty

Temples all over the world from different time periods. More than 2000 years of Temples to certainty and nuanced certainties. Americas, Asia, mountains, caves, rivers. Rocks strewn and re-used in new buildings. Temples everywhere in every time. They don't last long and they get dressed up in purple and expensive gold maintained by tyrants and psychopaths. A kind of school of psychopathy. As soon as the next earthquake, meteor, etc randomly turns up - certainty gets a bit of a hammering. People lose faith in certainty and try something else instead. Some try different flavours of certainty.

Explore my map

[https://www.google.com/maps/d/viewer?mid=1dlgz\\_4B5\\_uqCAHD4SoJKGaPgRW69WByi&ll=23.542274164902647%2C0&z=2](https://www.google.com/maps/d/viewer?mid=1dlgz_4B5_uqCAHD4SoJKGaPgRW69WByi&ll=23.542274164902647%2C0&z=2)

## Feminist Collectives

Women forgive women everything - especially their occasional psychopathy - because they all know how they behave (hysteria, psychopathy, lies, revenge, violence, etc). Women are forgiven for lying. Women are forgiven for crimes. Women band together to support women no matter what their crimes (unless the woman is a Liberal or an individual thinker). Labour party women and weak minded men make laws so women can always be permanently forgiven. Courts forgive women and demonize men. Media - especially ABC and Guardian always forgive women and demonize and attack those who dare to suggest women are not only as bad as men BUT WORSE. **Imagine that** - full on constant bigotry of groupthink and demonization but it is turned the other way - **imagine the outrage**. All of a sudden smug idiots, feminists, women (on average (wage)), weak minded men would say - "enough of the groupthink and bigotry". Or would they say - Let us get an "Office of Men" and an "Office of Sentient Pets" and an "Office of Blacks" and an "Office of Greens" and fight over funding.

Women form naturally into mobs - being higher on the "agreeableness" big 5. They also **prefer to not make a choice** in-case (might happen - anxiety) their agreeableness is upset by making a wrong choice (they cannot accept responsibility or accountability). The passive aggressive women laying naked on the bed, leaving their options open to say "You forced me to have sex" - I had no choice, I was coerced, he forced me to have children, get my boobs done, etc. He controlled me.

Don't upset my **permanent resentment/victim narrative** with the truth. My delusions are not only a sunk-cost investment but my cave of binary certainty.

Women gather around women in courts and media to support the passive aggressive victim narrative of women who **make no choice** other than **post-hoc victim/hero**.

## The Occasional Tyrant and Psychopaths

Psychopaths exist - they have been promoted to senior positions everywhere. Their tyranny is in obvious display yet people remain silent. The media supports lies and corruption worldwide. USA has an old man who can barely speak or form a sentence which makes any sense - **even worse** than my ramblings and rants - yet the delusion of competence and integrity is maintained by the media and public service. Nothing to see here. The tyrant has nothing to show - nothing to observe - nothing to learn. Look over here instead. Look at the "great cause" then you won't see my tyranny. I am not lying so much as just point you in the right direction. I'm **helping you focus of the "right" things and keeping you safe**. Follow the pretty lights of distraction. **Nothing to see here - look over here instead**. We do not debate anything - I already run the place why should I listen to anyone - WE are in charge here - you are not even in my electorate and even if you were I don't like you - you are the "others".

## A new dream of Anxiety

My dreams are interesting to me at the moment. Neil Diamond Hot August night and all the songs over and over and then *Sweet Caroline* over and over in my dream state until right on the start of one of the many *Bump, Bump Bah's* - the most predictable of all music ( I think he wrote everything using major chords E,A,D with an odd C or F) - **anxiety arose**. I grabbed it quickly to try to find what it was - it took some time as I was waking up but it was confusing and complex. There was the *anticipation* idea - what comes next in the sequence but then was a **dread**, a fear of this certainty, Not because the certainty contained a finality of something that existed within it - it was more nuanced and vague. The idea of certainty - it wasn't the final destination - it was the *predictable path*. **The path always goes like that** - this brought a strong feeling of instant anxiety which I was able to identify and describe here in the morning some hours after the dream. Fear of the predictable path - **not** because of the fearful destination - but of the **path itself**. Choice.

But I do this naturally, I naturally "rebel" in shops where all the products are placed in places designed to make you follow the advertiser's route. The Rat's Maze. The TV "reality shows" the predictable manipulation and emotional games of Media and Psychopaths.

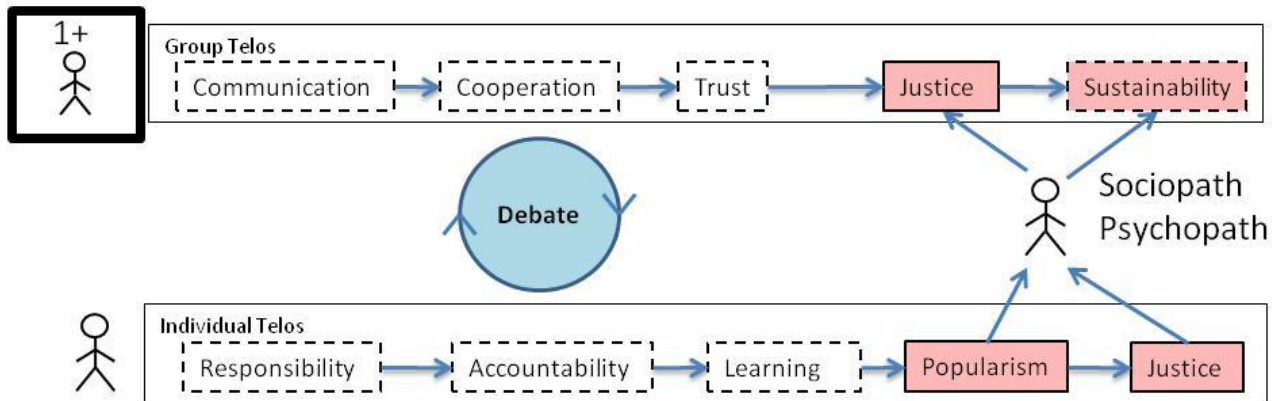

I walk the back streets of world cities. The street in Dubrovnik that slowly narrows to a pinch point where the raiders can be destroyed.

## Building Totalitarianism

Progressive slowly boiling the Frog - this is the way we have always done it. More temples to our entrenched certainty. More control - eliminate change and "dissent" Less freedoms more Authoritarianism - more instant judgment. More groupthink - the "others". All that is left is us and our certain dogma - nothing else.

## How Do Civilizations Fail?

**They are just words.** If you get upset then that's a good thing. If that volcano and tsunami **poses a difficult question** then GOOD. If a stranger invokes fear and possible inquiry - then take it on. If a comedian takes you out of yourself and ask questions THEN GOOD. They are just words and without them - **things get a WHOLE LOT MORE VIOLENT MORE QUICKLY.**

The petulant child hates debate. Just do! So we see the politicians around the country filling themselves with virtue using everyone else's money - silencing - cancelling debate, mandated justice, on the certain path to sustainability - the binary certain utopia. Maybe they did debate and learn once but then forgot and became Fat, Dumb and Lazy in their complacent (safe) "just" world. The Psychopath acts with malice, virtue and sheer bloody mindedness - it does not matter - they do whatever they feel like to anyone - change laws, order police to shoot people, threaten, cajole, bribes, nepotism, etc.

The sociopath will "change the world" - no debate required - progressively gathering more sociopaths and sentient pet psychopaths around them. Killing any opposition to their virtuous visions of utopia. Making up statistics at the ANU. Liars and bullshitters.

Andrew Barr makes laws about drugs because **he** thinks drugs should be available to anyone - the drug trade is important! (a crusade of certain justice) Andrew Leigh pokes his head up to announce that the A.C.T should be able to make certain dogma on death (Euthanasia).

Now the thing smuglifunts fail to notice is the idea of focus and proportionality. What to focus on and what are the right levels? So - should a local school be able to make laws about Euthanasia? What about a town council? Or a City Councils? Brisbane city is large enough isn't it? At what level should things be done within nations do you think? Who needs laws at all when certain righteous causes and justice is so easily implemented in schools? Tyranny is Ok sometimes. You need to RESPECT MY AUTHORITY! I am doing this for your OWN GOOD and to SAVE THE PLANET says the **grand poo-bah tyrant** (bullshit I say).

A problem is with Andrew Leigh and Andrew Barr in particular (although it applies to many politicians and all the feminists, women on average and weak minded men) is they are narcissists focused on their own virtue and their own agenda. They really do not debate or learn anything and are driven by the idea that they themselves are "popular" or working for **certain** "just" causes. They have no idea of how ignorant they really are. They surround themselves with sentient creatures who

grunt affirmation to their psychopathy. They do not answer questions and abuse and ignore those who DARE TO ASK.

The tyrant is Popular and Just. He considers herself popular if no-one has killed them yet - a kind of **low Barr**. Justice spews from the tyrant's mouth in every pontification - tyrants speaks the very language of justice. This is why convicting men and making orders against them without a trial or a right to have those orders overturned is "justice" to Barr. **His word is the law**. And the sycophants are rewarded for their contribution to the ongoing corruption. The "White Ribbon" cause is great!

The politicians around the place look very similar. You have these smug, self-congratulatory, masturbatory, virtue signaling abusers all round the country - big noting themselves in a constant delusion they want everyone else to join in with. Large businesses are saving the world with your money. Banks, Finance companies, superannuation funds, Grocery stores (donate your change for the cause) - you name it - all **their virtue** (your money) to make the world more certainly sustainable and "just". The ABC leads the way in justice and sustainability - it is far easier to do that than learn anything or do journalism. Organizations become infested with sociopathy and promote psychopaths to higher positions because of their psychopathic skills. Debate is stifled so individuals do not learn - responsibility, accountability is gone - outsourced to the legal scum - the courts, lawyers, lawmakers - grifting as much money from society as they can. In **emergency** (2 years and still going) "pandemics" masks are mandated for everyone except politicians, legal scum and public servants. **Choice is for the elites**. "Emergency" laws stay in place for ever and become more Authoritarian and Totalitarian. More emergency laws are **made permanently while under EMRGENCY law**. The Tyrant grows and grows in idiotology and self-possession gathering similar minded corrupters around them and handing over everyone's money.

The tyrannical psychopaths in power virtue signaling their corruption, lies and bullshit in an abusive and violent way on a population stripped of their resources so it can be handed to the elites, sycophants and mercenaries who facilitate the tyrannical power. Give the police a pay rise. More power, laws, rules and money for finding "dissidents".

Governments announcing money being spent on great "causes", women, in-groups and friends based on bribes, influence, corruption and **promises of other work** when out of government. Isn't about time we had an ex- politician appointed to highly paid government job or somewhere where they have made "friends" with your money?

Nothing is done because it is necessary, balanced, well-considered, proportional, **planned**, or at least part of general direction or idea, etc - it is because of an **urgent** (emergency/crisis) need and/or a just **cause** (world peace, "equality" or vague "virtue"). Everything is binary urgent/timely and the rest is only "infrastructure" - Office of Women is "infrastructure" - nothing to see here. For binaries there is **nothing between urgent and certain cause**.

Emergencies are celebrated and encouraged - not as **bad planning** - but an opportunity for the profiteers, plunderers, corrupt, power mongers to extort power and money from everyone.

There is no plan or even the idea of a general direction. Politicians plan for is their own re-election. Public servants plan is for their own advancement and retirement. Labour loses elections and blames voters for not understanding and agreeing with them. The voters are stupid it seems to them. So

then they turn to bribes and corruption - promises, secret deals. This is why police states have many police - they can extort money from residents for keeping them and their businesses "safe".

Who needs to invade Australia? It does not exist as a nation - there is nothing to invade.

States do what they like and split further apart based on their VARIATIONS OF TYRANNICAL PSYCHOPATHY. Pumped up Elites and self-possessed pig-ignorant power mad companies plan international operations, take-overs and nation controlling ventures for their own profits and "causes".

Where is this nation? What is it anyway? Hasn't it already gone?

40% is claimed by "First Nations" - most politicians are handing land and rights to black and pretending blacks. The ABC announces (dictated by policy made by virtue signaling corrupters entrenched at the ABC) that the land belongs to aboriginal tribes every day with every statement they make "coming from aboriginal country". Chinese have already taken ownership of much of the poorer world as people sell everything off - Darwin Ports, Land everywhere, mines, etc. Why start a new war when the current one is working so well? Simple invasion would require a negotiation with a town council, university, school, local council, state, territory, tribal elder somewhere with some more Pokie money and money for Andrew Barr's legalized drugs. Maybe it is revenge for the Opium wars?

City/States collapse all the time - for many reasons. Don't think it is because of famine, disaster or war. Read John Bar Penkaye (a whistleblower) below. It is worth reading his whole work. See <https://www.tertullian.org/fathers/>

## Recent Documents

**John Bar Penkaye** - [https://en.wikipedia.org/wiki/John\\_bar\\_Penkaye](https://en.wikipedia.org/wiki/John_bar_Penkaye) *Ktâbâ d-rêš mellê* or **Summary history of the world**

[https://www.tertullian.org/fathers/john\\_bar\\_penkaye\\_history\\_15\\_trans.htm#Book14](https://www.tertullian.org/fathers/john_bar_penkaye_history_15_trans.htm#Book14) "In the same way as we recounted earlier the deeds of the brave when we deserved praise, we should

**expose our weakness without concealment:** because the Scripture says: "Cursed is he who calls good evil and evil good." 16 This period of calm was to us the cause of so much weakness, that there happened to us what happened to the Israelites, of whom it is said: "**Israel has grown fat and lazy, he has become fat and wealthy, he has abandoned the God who made him, and despised the strong one that saved him.**" 17 The westerners, it is true, clung tightly to their sacrilegious (faith), but we who believe we adhere to the true faith, we were so far from the works of Christians, that if one of the former had risen and had seen us, he would have had been dizzy and said: "this is not the faith in which I died."

So I am forced to reveal everything, so that we know that everything that happened to us, happened to us justly, and that we were punished according to the measure of our deeds and our merits. 18 The **bishops have forgotten** the command: "**preach the word, get up with zeal, in season and out of season, keep trying, in all patience and doctrine.**" Instead of all this, **they did the opposite:** they dictated orders and shouting loudly as archons, and sent the terror of their voices to their subjects, like animals without reason. They drew their strength and power not from Christ, **but from the civil courts, involved themselves in public affairs and uncanonical quarrels.** They tried very much to show themselves ministers of Christ by **pride more than by humility.** They have many people running before and behind them. They receive ovations on horseback and mules, like hyparchs. **One mocks another, and a perpetual confusion reigns among them. They judge harshly and punish severely.** They teach not in order to edify, but to glory in twisted words and affected speech, and they always breathe severity. Even in their letters they speak like proud men. Look at those who are set at our head."

**The geography of Strabo** (Rank:60) :Author(**Strabo**) :Year(23) Age(86) :Keyword(Group Humanism Philosophy, History, Geography)

<https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Strabo/home.html>

<https://en.wikipedia.org/wiki/Strabo>

19 In the first place, I remark that the poets were not alone in sanctioning myths, for long before the poets the states and the lawgivers had sanctioned them as a useful expedient, since they had an insight into the natural affections of the reasoning animal; for man is eager to learn, and his fondness for tales is a prelude to this quality. It is fondness for tales, then, that induces children to give their attention to narratives and more and more to take part in them. The reason for this is that myth is a new language to them — a language that tells them, not of things as they are, but of a different set of things. And what is new is pleasing, and so is what one did not know before; and it is just this that makes men eager to learn. But if you add thereto the marvellous and the portentous, you thereby increase the pleasure, and pleasure acts as a charm to incite to learning. At the beginning we must needs make use of such bait for children, but as the child advances in years we must guide him to the knowledge of facts, when once his intelligence has become strong and no longer needs to be coaxed. Now every illiterate and uneducated man is, in a sense, a child, and, like a child, he is fond of stories; and for that matter, so is the half-educated man, for his reasoning faculty has not been fully developed, and, besides, the mental habits of his childhood persist in him. Now since the portentous is not only pleasing, but fear-inspiring as well, we can employ both kinds of myth for children, and for grown-up people too. In the case of children we employ the pleasing myths to spur them on, and the fear-inspiring myths to deter them; for instance, Lamia<sup>52</sup> is a myth, and so are the Gorgon, and Ephialtes,<sup>53</sup> and Mormolyce.<sup>54</sup> Most of those who live in the cities are incited to

*emulation by the myths that are pleasing, when they hear the poets narrate mythical deeds of heroism, such as the Labours of Heracles or Theseus, or hear of honours bestowed by gods, or, indeed, when they see paintings or primitive images or works of sculpture which suggest any similar happy issue of fortune in mythology; but they are deterred from evil courses when, either through descriptions or through typical representations of objects unseen, they learn of divine punishments, terrors, and threats — or even p71 when they merely believe that men have met with such experiences. For in dealing with a crowd of women, at least, or with any promiscuous mob, a philosopher cannot influence them by reason or exhort them to reverence, piety and faith; nay, there is need of religious fear also, and this cannot be aroused without myths and marvels. For thunderbolt, aegis, trident, torches, snakes, thyrsus-lances, — arms of the gods — are myths, and so is the entire ancient theology. But the founders of states gave their sanction to these things as bugbears wherewith to scare the simple-minded.*

*20 Now since this is the nature of mythology, and since it has come to have its place in the social and civil scheme of life as well as in the history of actual facts, the ancients clung to their system of education for children and applied it up to the age of maturity; and by means of poetry they believed that they could satisfactorily discipline every period of life. But now, after a long time, the writing of history and the present-day philosophy have come to the front. Philosophy, however, is for the few, whereas poetry is more useful to the people at large and can draw full houses — and this is exceptionally true of the poetry of Homer. And the early historians and physicists were also writers of myths.*

*9 Now inasmuch as Homer referred his myths to the province of education, he was wont to pay considerable attention to the truth. "And he mingled therein" a false element also, giving his sanction to the truth, but using the false to win the favour of the populace and to out-general the masses. p73 "And as when some skilful man overlays gold upon silver," just so was Homer wont to add a mythical element to actual occurrences, thus giving flavour and adornment to his style; but he has the same end in view as the historian or the person who narrates facts. So, for instance, he took the Trojan war, an historical fact, and decked it out with his myths; and he did the same in the case of the wanderings of Odysseus; but to hang an empty story of marvels on something wholly untrue is not Homer's way of doing things. For it occurs to us at once, doubtless, that a man will lie more plausibly if he will mix in some actual truth, just as Polybius says, when he is discussing the wanderings of Odysseus. This is what Homer himself means when he says of Odysseus: "So he told many lies in the likeness of truth;" for Homer does not say "all" but "many" lies; since otherwise they would not have been "in the likeness of truth." Accordingly, he took the foundations of his stories from history. For instance, history says that Aeolus was once king over the islands about Lipara, and that the Cyclopes and the Laestrygonians, inhospitable peoples, were lords over the region about Aetna and Leontine; and that for this reason the region about the Strait might not be visited by men of that time, and that Charybdis and the Rock of Scylla were infested by brigands. And from history we learn that the rest of the peoples mentioned by Homer lived in other parts of the world. And, too, it was on the basis of Homer's actual knowledge that the Cimmerians lived p75 about the Cimmerian Bosphorus, a gloomy country in the north, that he transferred them, quite appropriately, to a certain gloomy region in the neighbourhood of Hades — a region that suited the purpose of his mythology in telling of the wanderings of Odysseus. The writers of chronicles make it plain that Homer knew the Cimmerians, in that they fix the date of the invasion of the Cimmerians either a short time before Homer, or else in Homer's own time.*

[https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Strabo/2E2\\*.html](https://penelope.uchicago.edu/Thayer/E/Roman/Texts/Strabo/2E2*.html)

*“Take the case of the Greeks: though occupying mountains and rocks, they used to live happily, because they took forethought for good government, for the arts, and in general for the **science of living**. The Romans, too, took over many nations that were naturally savage owing to the regions they inhabited, because those regions were either rocky or without harbours or cold or for some other reason **ill-suited to habitation by many**, and thus not only brought into communication with each other peoples who had been isolated, but also **taught the more savage how to live under forms of government**. But all of Europe that is level and has a temperate climate has nature to **coöperate with her toward these results**; for while in a country that is blessed by nature everything tends to peace, in a disagreeable country everything tends to make men warlike and courageous; and so **both kinds of country receive benefits from each other**, for the latter helps with arms, the former with products of the soil, with arts, and with character-building. But the harm that they receive from each other, if they are not mutually helpful, is also apparent; and the might of those who are accustomed to carry arms will have some advantage unless it be controlled by the majority. However, this continent has a natural advantage to meet this condition also; for the whole of it is diversified with plains and mountains, so that throughout its entire extent the agricultural and **civilised element dwells side by side with the warlike element**; but of the two elements the one that is peace-loving is more numerous and therefore keeps control over the whole body; and the leading nations, too — formerly the Greeks and later the Macedonians and the Romans — have taken hold and helped. And for this reason Europe is most independent of other countries as regards both peace and war; for the **warlike population which she possesses is abundant and also that which tills her soils and holds her cities secure**. She excels also in this respect, that she produces the fruits that are best and that are necessary for life, and all the useful metals, while she imports from abroad spices and precious stones — things that make the life of persons who have only a scarcity of them fully as happy as that of persons who have them in abundance. So, also, Europe offers an abundance of various kinds of cattle, but a scarcity of wild animals. **Such, in a general way, is the nature of this continent.**”*

**The Constitution Of The Athenians** :Author(**Aristotle**) :Year(-325) Age(59) :Keyword(Group Humanism Politics, Law) [https://en.wikipedia.org/wiki/Constitution\\_of\\_the\\_Athenians\\_\(Aristotle\)](https://en.wikipedia.org/wiki/Constitution_of_the_Athenians_(Aristotle)) [http://classics.mit.edu/Aristotle/athenian\\_const.1.1.html](http://classics.mit.edu/Aristotle/athenian_const.1.1.html) <https://www.bl.uk/collection-items/the-constitution-of-the-athenians>

**Plutarch, The Parallel Lives - The Life of Solon**

[https://penelope.uchicago.edu/Thayer/e/roman/texts/plutarch/lives/solon\\*.html](https://penelope.uchicago.edu/Thayer/e/roman/texts/plutarch/lives/solon*.html)

*“5 1 In particular we are told of private intercourse between Solon and Anacharsis, and between Solon and Thales, of which the following accounts are given.<sup>8</sup> Anacharsis came to Athens, knocked at Solon's door, and said that he was a stranger who had come to make ties of friendship and hospitality with him. On Solon's replying that it was better to make one's friendships at home, "Well then," said Anacharsis, "do thou, who art at home, make me thy friend and guest." 2 So Solon, admiring the man's ready wit, received him graciously and kept him with him some time. This was when **he was already engaged in public affairs and compiling his laws**.*

*81 Anacharsis, accordingly, on learning what Solon was about, **laughed at him for thinking that he could check the injustice and rapacity of the citizens by written laws**, which were just like **spiders'***

*webs; they would hold the weak and delicate who might be caught in their meshes, but would be torn in pieces by the rich and powerful.* 3 To this Solon is said to have answered that men keep their agreements with each other when **neither party profits by p417 the breaking of them**, and he was adapting his laws to the citizens in such a manner as to **make it clear to all that the practice of justice was more advantageous than the transgression of the laws**. But the results justified the conjecture of Anacharsis rather than the hopes of Solon. It was Anacharsis, too, who said, after attending a session of the assembly, that he was amazed to find that among the Greeks, a the wise men pleaded causes, but the fools decided them."

## Data Sources

I am becoming interested in volcanoes and their influence on human development. They seem to provide sufficient life threatening tension - posing significant questions and invention - to come to terms with. This necessary tension seems to spark something in humans. There are recent volcano databases being developed in a number of places. I am attempting to integrate the information into my database to do further analysis and generate google maps type KML to further my human investigations.

I do data matching and analysis. Data integration is not easy and beings able to do this at multiple layers of abstraction (on a continuum) while understanding and exploring sufficient detail - **is** a skill. Like a search/explore algorithm of everything AND intelligently expanding explorations and abstractions as required. Sufficiently certain dogma balanced with suitably vague uncertainty.

**Global Volcanism Program, Smithsonian Institution** <https://volcano.si.edu/volcano.cfm?vn=223020>  
**Nyamulagira** is a volcano on one database. But on another database **NOAA** (a US Government website) (supposedly aligned **Global Volcano Locations Database** *NCEI maintains a database of over 1,500 volcano locations obtained from the Smithsonian Institution Global Volcanism Program, Volcanoes of the World publication. The database includes information on the volcano name, location, elevation, volcano type, date of the last known eruption, and the certainty of Holocene volcanism.*) it is <https://www.ngdc.noaa.gov/hazel/view/hazards/volcano/loc-data?nameMatch=Nyamuragira> **Nyamuragira** (spelling). This means that matching the data is

difficult because each agency collecting data does not use the same identifiers or spend much effort on data integrity. It also may be a general competence issue (no-one is perfect) so when you investigate and match there are **always problems**.

We have <https://www.ngdc.noaa.gov/hazel/view/hazards/volcano/loc-data?nameMatch=Piparo> **Piparo** on NOAA but **not in Smithsonian database**. [https://volcano.si.edu/search\\_volcano.cfm](https://volcano.si.edu/search_volcano.cfm) but on wiki it is a mud volcano <https://en.wikipedia.org/wiki/Piparo>. So it looks like NOAA decided to mark it as a “volcano” on its database independently of the **Smithsonian database**.

We also have other databases like <https://www2.bgs.ac.uk/vogripa/index.cfm> **Volcano Global Risk Identification and Analysis Project (VOGRIPA)** which again is slightly different - so integrating information across many database is a skill and takes some effort to see the whole picture and identify the data matching issues.

**An Aside:** I remember migrating the Tax Office data to a new system - the client register. I checked and doubled checked all the data - correct errors, standardized fields, **did everything I could to reduce the errors** and check that everything was as correct as possible and one of the senior managers was perplexed why I did so much work. I even printed a full statistical report called “Fully exposed” (no individual details). Databases rarely implement full referential integrity (think exceptions) so unique key relationships and other key information is often corrupted on the fly by programs and bad systems so over time the quality gets worse. Each migration is an opportunity to improve and explore. If you have not explored name address and other details of every individual on a continual basis examining patterns and problems in data then you may not know what I am talking about.

18. <http://www.china.org.cn/e-gudai/1.htm> "Most of the palaeoanthropologists of China do not agree with this. The large amount of palaeoanthropological fossils found in China suggest that Yuanmou Man of 1.7 million years ago, New Cave Man of 100,000 years ago, Upper Cave Man of 18,000 years ago and Jalai Nur Man of 10,000 years ago all had high cheekbones, flat nose bridges and spade-shaped upper front teeth, which are all characteristics of modern man in China, indicating genetic stability and evolutionary continuity. In particular, the span of 330,000 years from Peking Man, to New Cave Man and Upper Cave Man, who all made their home in the Zhoukoudian area, effectively testifies to the fact that the yellow race evolved from a local ape. Backed by solid proof, almost all of China's palaeoanthropologists support the theory of "regional evolution" of the origin of man."

20. [https://en.wikipedia.org/wiki/Shoichi\\_Yokoi](https://en.wikipedia.org/wiki/Shoichi_Yokoi) Shōichi Yokoi (横井 庄一, Yokoi Shōichi, 31 March 1915 – 22 September 1997) was a sergeant in the Imperial Japanese Army (IJA) during the Second World War, and was among the last three Japanese holdouts to be found after the end of hostilities in 1945. He was discovered in the jungles of Guam on 24 January 1972, almost 28 years after U.S. forces had regained control of the island in 1944.

23. Klimesch W. The frequency architecture of brain and brain body oscillations: an analysis. *Eur J Neurosci.* 2018;48(7):2431-2453. doi:10.1111/ejn.14192  
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6668003/> "An analysis of the center frequency of traditional frequency bands and their coupling principles suggest a binary hierarchy of frequencies. This principle leads to the foundation of the **binary hierarchy brain body oscillation theory**. Its central hypotheses are that the frequencies of body oscillations can be predicted from brain oscillations and that brain and body oscillations are aligned to each other. The empirical evaluation of the predicted frequencies for body oscillations is discussed on the basis of findings for heart rate, heart rate variability, breathing frequencies,

*fluctuations in the BOLD signal, and other body oscillations. The conclusion is that brain and many body oscillations can be described by a single system, where the cross talk – reflecting communication – within and between brain and body oscillations is governed by  $m : n$  phase to envelope and phase to phase coupling.”*
